## TO

## GEORGE FREDERICK WARNER

LIT'T.D.
ASSISTANT KEEPER OF MANUSCRIPTS
AT THE BRITISH MUSEUM
IN ACKNOWLEDGMENT
OF CONSTANT AND GENEROUS HELP
IN ALL DIFFICULTIES
THIS WORK
IS GRATEFULLY INSCRIBED.

## PREFACE.

I wISH in the forefront of my work to discharge the pleasant duty of recording my thanks to those who have with their kind assistance helped me in the fulfilment of my task. In the first place my hearty thanks are due to the Governors of Dulwich College for kindly allowing the manuscript of Henslowe's Diary to be deposited at the British Museum for my use, and for the courtesy and patience with which they have borne with me in a series of unavoidable delays. I should in particular mention Sir Robert Douglas, who most kindly undertook the duty of intermediary. Next I must record my deep indebtedness to the officials of the Manuscript Department at the British Museum. To Dr. Warner, who not only helped me in numerous cases of difficulty, but kindly consented to read the proofs of the section of my Introduction dealing with the knotty question of the forgeries, I have had an opportunity of expressing my gratitude elsewhere ; but I have here to acknowledge a scarcely smaller debt to Mr. F. B. Bickley and Mr. J. A. Herbert for assistance on innumerable occasions. Lastly my best thanks are due to my friend Mr. A. H. Bullen, who originally suggested to me the idea of the present edition, volunteering himself to undertake the publication, and further supplied many helpful suggestions during the course of the work.

This is also a fitting place in which to mention several printed works of which I have made free use, and which are occasionally quoted by abbreviated titles. These are:
J. P. Collier. The History of English Dramatic Poetry to the time of Shakespeare; and Annals of the Stage to the Restoration. 1831. 3 vols. A reprint appeared in 1879, also in 3 vols.

Memoirs of Edzard Alleyn, Founder of Dulwich College: including some new particulars respecting Shakespeare, Ben Jonson, Massinger, Marston, Dekker, © © c. Shakespeare Society. 1841.
J. P. Collier. The Diary of Philip Henslowe, from 1591 to 1609 . Printed from the original manuscript preserved at Dulwich Coliege. Shakespeare Society. 1845.
George F. Warner. Catalogue of the Manuscripts and Muniments of Alleyn's College of God's Gift at Dulwich. 188 I.
William Young. The History of Dulwich College, with a Life of the Founder, Edward Alleyn. 1889. 2 vols.
Francis B. Bickley. Catalogue of the Manuscripts and Muniments of Alleyn's College of God's Gift at Dulwich. Second Series. 1903.

Park Lodge, Wimbledon. August 1904.

Walter W. Greg.
N.B.-The modern foliation inserted in pencil in the original manuscript has been followed in this reprint, and it is by this that all references are made. Clarendon numerals refer to the folios, ordinary numerals following to the lines. Thus $44^{v}$ is means: Folio 44 verso, line 15.

## INTRODUCTION.

§ i. History of the MS.

Of all documents illustrating the external history of the Elizabethan drama the most important that has escaped the ravages of time is undoubtedly the volume of miscellaneous accounts and memoranda commonly known as 'Henslowe's Diary.' The volume was first used by a certain John Henslowe for the entry of accounts of the felling and disposal of timber and other matters relating to Ashdown Forest. His accounts belong to the years 1576 to 1581 . After this the book appears to have been laid by for some time, for we next find it in use by Philip Henslowe in London early in I 592. By him it was used for the entry of a variety of accounts and memoranda relating both to private affairs and to business transactions, dramatic and other, during the following eighteen years. The latest entry dates from 1609. In the meantime Edward Alleyn, who had married Henslowe's step-daughter, retired from the stage about 1604 , and some ten years later he founded the College of God's Gift at Dulwich. Into his hands Henslowe's papers, the Diary among them, passed, presumably on the latter's death in 1616 , and they thus found their way into the library of the College. Here they remained unmolested for more than a century and a half. It was not till 1780 that their existence became known to Edmond Malone, and when he then approached the authorities of Dulwich, the Diary proved to have been mislaid. Shortly before 1790, however, the MS. was discovered and entrusted to Malone, who was then engaged upon his 'Variorum' edition of Shakespeare. ${ }^{1}$ He caused a transcript of such portions as he deemed of importance to be prepared, and of this he printed an abstract in the appendix to the 'History of the Stage' prefixed to his edition (vol. I. pt. ii. p. 288), with the addition of a few other documents from the same source. This transcript was collated with the original by Malone himself, and contains a variety of notes and corrections in his hand. He possibly intended to make more extended use of it in the revised edition of his Shakespeare, for which he spent many years collecting material, but which he left to James Boswell the younger to bring out after his death. Malone, it would appear, kept the original in his possession till his death in 1812, when it was returned to Dulwich by his literary executor. ${ }^{2}$ Boswell, however, when
${ }^{1}$ Warner, p. viii. $\quad{ }^{2}$ Collier, Alleyn Memoirs, p. 2.
he published the revised 'Variorum' of 182 I (vol. III. p. 295), appears merely to have reprinted the extracts as they stood in Malone's previous edition, though the transcript was in his possession at the time and appeared in the sale of his books in 1825 (No. 3141). The transcript reappeared in the Heber sale, whence it passed into the possession of Sir Thomas Phillipps, and after his death again came into the market in 1895. On this last occasion it was purchased, on the recommendation of Dr. Warner, by the Governors of Dulwich College, and now forms part of that library. ${ }^{1}$

The next person, so far as is known, to make use of the MS. was J. P. Collier, ${ }^{2}$ who had recourse to it when engaged on his History of Dramatic Poetry (1831), and reprinted the whole, so far as it relates to dramatic affairs, for the Shakespeare Society in 1845. Since Collier's edition appeared many scholars have inspected the volume either for the sake of the evidence it supplies concerning the conditions of the Elizabethan drama, or else attracted by the controversy which long raged round certain entries which were alleged to have been forged in it. The volume was described, and a careful though not quite complete list of the forgeries given, by Dr. G. F. Warner in his invaluable Catalogue of the Manuscripts and Muniments of Alleyn's College of God's Gift at Dulzwich (1881). Finally, at the suggestion of Mr. A. H. Bullen, I applied, in the autumn of 1902 , for permission from the Governors of the College to have the MS. temporarily deposited at the British Museum, in order to prepare a new edition, a request to which they most generously and courteously acceded, and the transference of the precious document was effected through the kind mediation of Professor, now Sir Robert, Douglas.

[^0]
## § if. Description of tile MS.

Henslowe's Diary, now MS. VII. in the Dulwich Library, is described by Dr. Warner in his Catalogue as a small folio of 238 leaves. ${ }^{1}$ This reckoning, however, omits four blank folios in the middle of the volume (between 125 and 126), though it includes casual blanks elsewhere (84, 130, 150, 155, 173, 212). It consists of good paper, and was originally cased in a limp vellum wrapper, which, when the volume was rebound, was preserved and inserted at the beginning. Like the first and last pages, the inside of the cover is more or less covered with scribble, chiefly in Henslowe's hand (see Preliminary Note). The general state of preservation is good, a few margins only being torn or frayed, and one apparently burnt. It is to be regretted, however, that a certain number of pages have been bodily removed, while others have had larger or smaller portions cut or torn away. Some of these mutilations apparently date, as Dr. Warner pointed out, from Henslowe's own time (cf. notes on $12^{v}$ and $229^{v}$ ), while the great majority, on the other hand, are undoubtedly modern. On this point Collier, in the Introduction to his edition of the Diary (p. xii), writes as follows: "It is necessary to remark that this volume, the value of which is at present so well understood, and so justly appreciated, by the authorities of Dulwich College, is not now in the state in which it existed when in the hands of Malone. This fact is established by the circumstance, that Malone made long and curious quotations from parts of it not now found in the manuscript: these evidently formed a portion of it, when it was for so many years in his hands; and, in order that our work may be as complete as possible, we have added them in the form of an Appendix : as however they have disappeared from the original, of course we are without any means of correction or verification, and we have been obliged to take them as they stand in vol. iii. of Malone's Shakspeare by Boswell.
"There is good reason to suppose that, when Henslowe first availed himself of the parchment-covered book for the purpose of entering his theatrical memoranda, leaves and parts of leaves had been cut out ; but there can be no doubt that, within perhaps the last fifty years, it has been still further mutilated, and that many pages have been torn, cut, and otherwise injured, by inconsiderate lovers of the autographs of our old poets and actors. In some instances, the signatures only have disappeared, while in others, the whole of an entry has been removed. This damage must have been done considerably before the time of the present or of the late Master of Dulwich College : ever since it was restored by Malone ${ }^{2}$ to its

[^1]ancient depository, it has been preserved with the care and caution due to the extraordinary curiosity and interest of the relic."

The implication is obvious, namely, that the portions containing the 'long and curious extracts' printed by Malone were purloined either by him or by his executor. This, however, rests upon a misapprehension on Collier's part. The documents in question, certain theatrical inventories, are explicitly stated by Malone to have been found in a bundle of loose papers from Dulwich, and consequently did not form part of the Diary. ${ }^{1}$ It is true, however, that all trace of these documents has now been lost. By whom or when the mutilations in the Diary were made there is no conclusive evidence to show, and it is impossible to acquit Malone and Boswell jointly of gross carelessness in the matter if of nothing worse. On the other hand, two of the missing fragments have found their way to the British Museum, and one of these, all autograph entry by Alleyn, is contained in a MS. scrap-book put together by Collier. ${ }^{2}$ These fragments will be found reprinted in section viis. of the present Introduction.

The earliest entries in the Diary, the forestry accounts namely, were made from what is now the back end, and the leaves were also numbered throughout in that direction. The foliation adopted in the present reprint is the modern, inserted in pencil by Dr. Warner, and beginning from the end at which Henslowe commenced his dramatic accounts. The original foliation is in ink, and follows a somewhat unusual system of notation. The numbers up to a hundred were entered in regular succession, but when that number was reached the scribe was at a loss how to proceed. He appears to have excogitated the device of writing first the number 100 and then adding the odd tens and units. Thus we soon reach such numbers as 10027 and later on 20087. In spite of certain irregularities and uncertainties this foliation is of the greatest value in helping us to determine what leaves are missing, a point occasionally alluded to by Collier in his notes, but which, since the volume has been rebound, it would otherwise be impossible to ascertain. I therefore give in this place a full list of the numbers missing in the original foliation, together with notes on such irregularities as are now determinable. The first two leaves have been repaired at the corners, and no trace of the numbers is now visible. From the scribble on the first, however, we may infer that it was the outside leaf as early as 1576 (see Preliminary Note). The third leaf is numbered 6 , so that three leaves are missing somewhere before this. Further leaves wanting are $8,33,40-42,47,63,72,78,80,87,98$. The number ioI was originally omitted, and though 102 has been altered to Ior, and 103 to 102,

[^2]the correction has been carried no further, so that the numbering still jumps one. Wanting further: $111,116,124,128,132-3,135$. The blank leaves not reckoned in the modern foliation are numbered $136,137,138$, and 142 , three leaves being lost. Wanting again: 143-4, 147, 150-2, 154-6, 167-8, 175-7, 181-2, 185-6, 188, 196-7. Between 205 and 208 is one leaf only, but the number is cut off. Wanting: 213,219,221,236-8, 242-4, 251, 255. Between 269 and 273 are two leaves only in both of which the number is cut off. Wanting: 281, 285, 288, 295, 300-1, 306. The corner of the last leaf, which now follows 308, is gone, but if the scribble be taken to indicate that it was originally the last leaf, it must be an even number (? 310 ), and the previous leaf, 309, must be wanting. ${ }^{1}$ The scribble at the end, however, appears to be all in Philip Henslowe's hand. ${ }^{2}$ In some cases it is highly probable that the leaves were already missing when Henslowe used the volume, and this may have been the case with most or even with all. It would be interesting to have a minute description of the volume before it was rebound, but such unfortunately does not appear to exist. All we can say at present is that the accounts on 131 and 134 ( 127 and 126 of the modern foliation), 195 and 198 ( 92 and 91 ), 276 and 278 ( 26 and 25), 299 and 302 ( 8 and 7), appear to be continuous, and preclude the idea that any of Henslowe's accounts at any rate are wanting at these points. Folio 72 , if present in his day, probably contained rents, while 219 and 242-4 may have contained part of the pawn accounts, which now begin somewhat suddenly on 218 and 241 respectively. Lastly, I may mention that between 84 and 85 , and forming. 167 of the modern numbering, there is inserted a leaf which clearly does not belong to the original volume. It is a trifle wider than the rest of the leaves, even without the mounting paper, so that the edge has had to be turned in, and it has evidently lain about folded like a letter. It contains, in the same hand as the forestry entries, an account with one Rowland Bartlet, dated Nov. 27, 1577. Its present place in the volume is due to its being inserted next to accounts of a similar date with various persons of the same family name. The loose leaf probably always lay in the volume, for it bears a few words scribbled in H.'s hand (see notes).

I now, following the modern foliation, give the position of all mutilations. These were made good with blank paper when the volume was bound. I mention whether they occur at the top, middle, or bottom of the leaf, but further details concerning the size of the portion wanting must be sought in the text so far as they occur in the parts of the MS. I have reprinted. 5 foot, 12 hole in mid., 29 mid., 30

[^3]top and foot, $\mathbf{3 1}$ foot, $\mathbf{3 3}$ mid., 60 mid., 83 foot, 88 foot, 111 top, 114 mid., 132 top, 187 top, 189 top, 190 top, 191 top, 199 top, 200 top, 206 top, 207 top, 208 top, 209 top, 228 top, 229 top corner, 231 foot, 236 top. ${ }^{1}$ It will be noticed that in almost every case, since the volume was began at both ends, the mutilation has been made in the lower part of the leaf as it presented itself to the writer. Those on 12 and 229 are unquestionably old, while that on 231 was made for the sake of Alleyn's autograph already mentioned. Some at least of the strips cut out of the middle of the leaves are due to unsuccessful attempts at forgery, notably that on 29.

## § ifi. Contents of the MS.

The accounts and memoranda contained in the Diary may be divided for convenience into six groups. (a) First we have the forestry accounts, which are the oldest, and are not directly connected with Philip Henslowe ; (b) next, the accounts of the pawn transactions carried on either by him personally, or else through or on behalf of other parties; (c) thirdly, his accounts relating to family, domestic, or private matters. The last three groups only are dramatic : they comprise ( $d$ ) receipts from the theatres, (e) expenditure whether current or exceptional, and lastly $(f)$ miscellaneous entries and memoranda relating to dramatic affairs.
(a) I have already mentioned that the forestry accounts begin at what is now the back end of the volume. They appear to have been very carefully and methodically kept, but as a separate leaf was devoted to each individual account, not only are there many blank spaces left, but the dates do not run consecutively throughout. In the midst of the scribble on the last leaf we find the notes 'This is John henslow Boke 1577 ', and lower down 'The Boke of Reconȳge ffor this yeare 1576 \& 1577 ' (see Prelim. Note). The latest of the ordinary entries is, I think, one of Nov. 23, 1578 , but there are other memoranda subsequent to this, one concerning Rowland Bartlet as late as Dec. 10, 1581. We learn, however, from an entry on $145^{v}$ that there was a separate 'boke of $1578^{\prime}$. Most of the accounts are with individuals, and we find such headings as: 'Pad to thomas turner ffor his Cuttynge in the fforrest as ffolloweth'. Elsewhere, however, the accounts are grouped under heads, for instance : ' Pad to the Cutters in the fforrest', 'ffor Cuttynge', 'Caringe \& other worke', 'Cvttynge \& other worke', 'Cuttynge in the fforrest'. In one place occurs the heading : ' Payd to the Collyares [i. e. charcoal burners] in the fforrest', while in another we find mention of 'Marshals furnes', elsewhere of 'Langles ffurnes'. No doubt this is where most of the timber went, namely, to be made
${ }^{1}$ Without counting folio 12 , there are here twenty-five leaves mutilated. According to a memorandum quoted above, p. xiv, there were in 1840 twenty-two only, but it is possible that the examination was not very careful.
into charcoal for the iron foundries. These once extensive works, after reducing the woods of Ashdown and the yet broader forests of the Weald to the state of bare heathlands, perished for want of fuel, and were superseded by the more favourably situated industry of the North. The memory of them, however, lingers yet upon the borders of Kent and Sussex in place-names such as Foundry Pond and Furnace Lane.

With respect to the locality it will be noticed that most of the entries make mention merely of 'the forest,' it being obviously unnecessary for the writer to specify further. Only one entry, so far as I have discovered, actually supplies the name of the estate. This is on 205, and runs: 'Recond $w^{t}$ Jeffere the 3. daye of march [ 1577 ] ffor all the Coll he hathe sent in / out of the fforrest of asdowne ffrom logge heyll / ffyrst by Rychard dopson to langles ffurnes $\mathrm{xj}^{\mathrm{xx}}$ xiij lode . ... more sent to buxted iiij lode', etc. Since the 'logge heyll' frequently appears in the other accounts, we are justified in assuming that they all refer to the estate of Ashdown Forest in Sussex. This assumption is further borne out by the mention of a number of places, mostly as the homes of woodcutters, situated within or near the confines of the forest. Among these are Lewes, Buxted, 'fflechinge' that is Fletching, and 'hodley' probably West Hoathly. ${ }^{1}$

We have seen that a note in the midst of the scribble claims the book for John Henslowe. At the end of the forestry accounts we find a page, $138^{v}$, headed : ' Money Receved By me John henslow as ffoloweth', and, since this is in the same hand as the rest of the accounts, it is fair to conclude that he was the writer of them all. Below the heading are accounts ${ }^{2}$ relating to sums of money and a 'debenter' passing between John Henslowe while away in London, 'harman' on behalf of 'the mynarres,' one 'thomas Jansson' who may have been merely a messenger, a ' $m$ r lege' of London, and ' $m y$ bryther hogge.' This last name is not very clearly written, but on the following leaf $\left(\mathbf{1 3 7} \mathbf{7}^{v}\right)$ is a memorandum, in the hand of Edmond Johnson and witnessed by Nicholas Reynolds and Roger Hogge, of an agreement between Johnson on the one part and 'Ralfe hogge \& margarett hys wyef' on the other, dated Oct. 5, I580. It would therefore appear to be not improbable that this Margaret was the sister of John Henslowe. The relationship of these persons to Philip Henslowe I shall have to discuss in another place, but I may add here that he appears to have kept up some intercourse with the Ashdown district, for in the scribble on the end leaf we find a note in his hand to the effect that ' $\mathrm{m}^{r} \mathrm{D}$ [or C?] $\mathrm{m}^{\mathrm{r}}$ wente to grenstead the 14 of July 1593 ',' grenstead' being doubtless East Grinstead on the N.W. border of Ashdown Forest. Henslowe, moreover, owned land

[^4]at Buxted lying just on the farther side of the forest from East Grinstead. ${ }^{1}$ It may also be pointed out that the Arthur Langworth who is mentioned in Philip Henslowe's memoranda probably also makes an appearance in those of John Henslowe, for on $191^{v}$ we find the entry 'Sold to $\mathrm{m}^{r}$ Langworth the 17 of maye xxxix ${ }^{\text {th }}$ ewes \& xviijth Lames ffor nyne ponde / Appō Reconynge betwne my bryther \& hem '. Langworth was of Ringmer near Lewes.

Lastly, I may mention that all the accounts in this section are in the same hand, with the exception of the memorandum by Edmond Johnson above mentioned with the signatures of the witnesses thereto, and also a curious entry on $142^{v}$. This is in a hand which does not elsewhere appear; it follows immediately on some of the other accounts, and runs: 'Reconed $w^{\text {th }}$ hime [Steven Dobson] the 29 of maye 1578 for all the castinge of tenne tune of gunstones the some of -xls.' I am not sure whether the sum intended was $£ 10$ or $40 s$.
(b) We next come to the accounts relating to Philip Henslowe and his affairs. Of these it will be convenient to deal first with the only section not reprinted in the present edition. This is a collection of accounts of a pawn business, which was carried on from January 1593 fairly regularly for the space of two years and then in a spasmodic manner for another year or so. The accounts are throughout in Henslowe's own hand, and though the individual advances are for the most part small, the total amounts dealt with must figure to sums of some importance. Henslowe's actual relation to these accounts, however, is not very clear. There are three series. The first of these, comprising entries between Jan. 16, 1592-3 and Dec. 19 the same year, on folios 55 to 60, and followed on 61 by two additional entries of Feb. 14, 1593-4 and May 18, 1594, may be termed Frances Henslowe's account, the sums being in the great majority of cases advanced to him upon goods deposited by third parties. The second series comprises entries of Dec. 10, 1593 to Jan. 22, 1595, occupying folios 73-81. The first few advances are again eptered as made to Frances Henslowe, and though this formula is not persevered with, the note 'sence frances went', appended to an entry of May 18, 1594 , serves further to connect him with the transaction, and we can hardly be wrong in regarding this second series of accounts as the continuation of the first. The third series, occupying folios 136-133 at the other end of the volume, is headed on the first leaf ' $\mathrm{m}^{\text {r8 }}$ grantes Recknynge 1 593.' The dates are somewhat irregular. The first page of entries belong to Jan. to May 1593-4, but on the next page we find one entry as early as March 26, 1593 , followed by a few others of that year. After these come regular entries from Jan. 4, 1593-4 to the spring of $1594-5$,

[^5]when they begin to tail off and end with a few isolated entries, the last as late as April 12, 1596. It is of course possible that the heading on 136 applies to that page alone, but the dates of the other entries preclude our regarding them as a continuation of the former series. Whatever may have been Henslowe's actual position with regard to the business, a question into which it is not necessary to enter in this place, he appears to have carried it on through intermediaries such as Frances, Mrs. Grant, and certain Goody Watson and Anne Knox (or 'nockes') who figure largely in the accounts. There is not sufficient evidence for the identification of any of the persons incidentally appearing in these entries, and little is to be gained by conjecture. It will be sufficient to point out that the business would be likely to form a useful adjunct to dramatic management, since the articles deposited were in many cases rich stuffs and apparel, which if unredeemed would prove of value in the company wardrobe. In his History of Dramatic Poetry (183I, III. 85) Collier wrote with regard to these accounts: "The players often pledged their dresses with him, and afterwards hired them when they were wanted : this probably was the commencement of Henslowe's connection with plays and theatres." This somewhat imaginative view of the business was not repeated in his edition of the Diary. There is little evidence to support it beyond the fact of Frances' connection with the Queen's company : in any case, the extant pawn accounts all date from a period subsequent to Henslowe's earliest dramatic ventures.
(c) All the rest of the accounts will be found reprinted in full in the ensuing pages, and it is therefore unnecessary to describe them in detail here; a general analysis will suffice. In the first place, then, we have certain accounts and memoranda of Henslowe's which are unconnected with the stage, and which may for convenience be grouped together under the head of 'personal.' These may be roughly divided into the following classes: (i) family business, such as Henslowe's journeys into the country at the time of his brother Edmond's death, and expenses in connection with the guardianship of his children; (ii) legal expenses of all sorts not connected with the company ; (iii) accounts for the building or repair of private houses; (iv) rent returns; ${ }^{1}$ (v) a series of astrological formulæ, charms, receipts, and the like, with a few scattered notes of the same sort ;2 (vi) miscellaneous memoranda, notes, bonds, etc., referring to nondramatic affairs and including purchases and sales of land, either by Henslowe himself or on behalf of Alleyn, and their joint venture in starch-making. These entries do not bulk largely on the whole, but are scattered at random among the other accounts. Collier only printed a portion of them. Two things should be

[^6]borne in mind: one, that they must have formed a comparatively small part of Henslowe's private accounts, household expenditure being, for instance, unrepresented, and many transactions being recorded in other documents of which we find no trace here ; and the other, that it is often difficult, especially in the travelling and legal accounts, to know for certain whether they refer to private or dramatic business.
(d) We now come to the dramatic accounts. The first division of these consists of receipts from the playhouses, and of these the most important are the daily entry of performances, continued with breaks from Feb. 19, 1591-2 till Nov. 5, 1597. This series falls into three sections according to the form of entry used by Henslowe. From the beginning to May 16 , 1594 , the typical form is :
ne . . . R\& at harey the vj the 3 of marche 1591 . . . . iij11 $\mathrm{xvj}^{\mathrm{g}} 8^{41}$;
from June 3, 1594 to Jan. 22, 1596-7:
$$
y^{e} 8 \text { of June } 1594 \text { ne . . . K } \text { ł at bellendon . . . . . . . xvij ; }
$$
and from Jan. 24, 1596-7 to the end:
[marche 1 597] | $19 \mid$ ne.. $\mid$ tt at gvido $. . . . .|02| 00 \mid 00-13-01$.
In all three series the abbreviation $n e$ is usually placed opposite the first occurrence of a new title. With the vexed question of the significance of these letters, as also with the meaning of the sums entered I shall have to dcal at length when, in the second part of this work, I come to treat of Henslowe's connection with the history of the stage as a whole. Besides these daily accounts, we also find several notes of moneys received from the company, presumably in discharge of debts, and also entries of the weekly takings of the galleries in 1598 and 1599 .
(e) It is, however, the accounts of expenditure on behalf of the company that bulk largest in the Diary as here reprinted. These accounts begin on Oct. 2 I, 1 597, and continue with many breaks down to March 16, 1602-3. They are consequently altogether later than the daily receipt accounts detailed above. The form of the entries shows that the sums were paid on behalf of the company, and constituted advances made by Henslowe, for which the members from time to time acknowledged their indebtedness. There is, however, another series of accounts relating to dramatic expenditure which are real debit accounts of Henslowe's own. These are the records of sums paid at various times for the erection or repair of his playhouses. Henslowe is not always very explicit as to the nature of the work to which his accounts refer, but he tells us sufficient to enable us to identify several theatrical buildings apart from his own and Alleyn's private residences.
( $f$ ) Lastly, there are contained in the Diary a large assortment of miscellaneous entrics of various kinds, all more or less closely connected with Henslowe's theatrical undertakings. Nothing would be gained by attempting to give a complete catalogue of them here ; they will be taken into account in their proper place later
on. They include all sorts of memoranda, such as loans to players and authors, engagements of actors, payments to the Master of the Revels, notes concerning restraints or 'inhibitions,' difficulties with the civic authorities, and legal proceedings connected with members of the company. These have all to be considered in connection with a number of other documents outside the Diary itself, but many of which are like it preserved in the Dulwich collection. It is sufficient in this place to note their occurrence.

## § iv. Henslowe's Handwriting.

The great bulk of the MS., apart from the forestry accounts already discussed, is in the hand of Philip Henslowe. The only exceptions are to be found in a number of scattered entries by a variety of different persons, nearly all of whom can be identified. Collier, indeed, asserted in the Introduction to his edition, that Henslowe was "assisted here and there by some clerk or scribe whom he employed," though his notes show that he was never very sure as to whether a particular entry was by Henslowe himself or not. His words certainly seem to imply that apart from the incidental appearance of other hands, the occurrence of which he frequently notes, he was able to trace two distinct hands in the main body of the accounts. Moreover it would appear to be a fair deduction that he regarded Henslowe himself as responsible for the major part. Yet he made no systematic nor even definite attempt at all, to distinguish between these two hands. He alludes ( p .50 ) to the entries on $1 \mathbf{1 1}^{\mathrm{v}}$ as being by "Henslowe or his scribe." Concerning the receipt to T. Newman, 2 I4-16, he writes (p. 3): "This is not Henslowe's writing, but that of some scribe he employed, whose hand is very commonly found in the MS." In spite, however, of the appearance of the unusual form 'Hensley,' this entry is undoubtedly in the same hand both as the surrounding entries and as the main bulk of the accounts. Alleyn's signature at $30^{\circ} 7$, and those of Griffin, Drayton and Chettle at $31^{v} 7-10$, are given for no apparent reason to the scribe ; so is the agreement between Alleyn and Langworth, 24 1-14, while Henslowe's signature as witness is correctly recognised as autograph. Upon the memorandum of the forfeit of widow Valle's lease, $\mathbf{7 2}^{v}$ II-22, to which H. Davis' name is appended as witness, Collier has the note (p. 178): "If this were the original writing and signature of Hugh Davis, (as it would seem to be,) it shows that he was the scribe or clerk Henslowe sometimes employed in keeping his books and writing his letters. However, by an entry on p. 59 [13v 6], it seems that Hugh Davis was only a marksman." It is obvious that the latter part of this note stultifies the suggestion put forward at the beginning, and throughout it is abundantly clear that the editor was entirely at a loss to distinguish
between the two hands he professed to discover. Whether Collier deliberately invented the scribe in order to confuse his readers, and so render the detection of his own forgeries less easy, or whether he was himself misled by the considerable variations in Henslowe's hand, I do not presume to determine. Suffice it to say that, with the exception of the specific cases to be discussed in the next section, there is no ground whatèver for supposing that more than one hand appears in the MS.

It is true, however, that that one hand presents some remarkable variations. The most obvious of these occur in the signatures. Whenever the name comes in the course of an entry it is written in the same hand as the rest. There are, however, cases in which it is subscribed and bears little resemblance to the rest of the writing. In these cases two distinct styles can be traced: one is found in the subscription to the letter to Vaughan, 72 24, the other in signatures to memoranda, 2415 and $\mathbf{8 9}^{\circ}$ 30. Both these styles, as well as that of the entries, can be traced in the scribble at the two ends of the volume. They differ among themselves less than the signature of George Chapman at 908 differs from that in the British Museum MS. Addit. 30262, f. 66. Next as to the entries. Allowing for the difference of pens, ink, and conditions, there is no difficulty in tracing the same hand through the bulk of the accounts, but it must be admitted that there are one or two entries, the most notable being that written up the page on $113^{v}$, which betray a much more careful and formed hand than the rest, without any apparent loss of ease and fluency. If the above-mentioned entry stood alone, one would, I imagine, have no hesitation in ascribing it to a different hand, but it is noticeable that there are a number of other entries serving as intermediate links between it and the more usual style. On examination, moreover, it will be found that there are certain distinct similarities in the formation of individual letters even where the general appearance is most different, and after no little consideration I have convinced myself that they are, after all, by the same hand.

Though not as a rule difficult to read, Henslowe's handwriting is irregular and uneducated like his spelling, and consequently often gives trouble in individual passages. It is at times far from easy to tell exactly what he has written, so that I have been constantly forced to print a compromise between what he apparently intended to write and what can actually be read. I am inclined to insist upon this point since it applies, I fancy, to many more texts based on MSS. than their editors seem willing to allow. The readings must be to a very large extent determined by two mutually dependent factors. ${ }^{1}$ We can only guess at the writer's intention through what we can decipher of his writing, while on the other

[^7]hand we are frequently forced to interpret the writing in the light of the supposed intention. This logically far from rigorous method will, however, as a rule, yield results satisfying the conditions of historical certainty; the more important cases of possible ambiguity are discussed in the notes.

A few general remarks on the possible sources of error may be brought together here. In the first place, it should be mentioned that practically throughout it is impossible to distinguish with certainty between $n$ and $u$; they have to be differentiated on external grounds. The complication which thus arises is aggravated by the fact that Henslowe is frequently careless as to the number of minims which he forms, so that $m$ and $n n$ are practically indistinguishable, and we even occasionally find an undoubted $n$ where $m$ was clearly intended. Particularly is this the case in the final position, where all but the first minim alike of $n$ and $m$ is frequently absorbed into the tail. In these cases I have thought it desirable to follow the intention of the writer rather than the strict form of the MS. To add to the confusion, $i$ is as often as not undotted, and $r$ frequently degenerates into a simple minim. So again $f$ and long $s$, though as a rule distinguished, are occasionally liable to confusion, and have been silently differentiated on external grounds, since it was obviously undesirable to draw between the forms an arbitrary distinction which would not have been recognised by the writer himself. Yet another case in which it has been necessary to rely on external evidence is that of the contractions $w^{c h}$ and $w^{t h}$, standing for which and with respectively, which are in practically every case indistinguishable as far as form is concerned.

The greatest difficulty of all, but happily one of little or no practical importance, is the distinction between majuscule and minuscule forms. It should be premised that the two forms are used absolutely indifferently ; proper names, and even the name of the deity, are constantly written with minuscule forms, while majuscules appear at the beginning of quite unimportant words or even now and again medially. Whether it would not under the circumstances have been better to abandon the original altogether and follow the modern practice, may well be questioned, but I hardly cared to venture upon so revolutionary a change. I have therefore attempted, to the best of my ability, to render the distinction between majuscule and minuscule forms by the use of upper and lower-case letters. In doing so, however, considerable difficulties have been met with, for there are cases in which it is impossible to draw any hard and fast line between the forms. With regard to the letter $d$, for instance, it may be said that there is never any difference of form at all, but that certain instances in which the letter is larger and more carefully made were probably intended as majuscules. In such cases as this I have been guided rather by the form than the size and other more or less intangible evidences of intention, and have consequently represented nearly all Henslowe's $d$ 's by lower-case letters, though there can be no doubt but that he must have intended some for majuscules.

In other cases the difficulty arises not from there being only one form, but from there being threc. We find, namely, at the beginning of words, a form intermediate between minuscule and majuscule, which may be appropriately termed 'initial.' This may arise in several ways ; either by an elaboration of the minuscule form, or by an attraction of that form of the majuscule, or by a combination of both these processes. An instance of the former is the letter $a$, an initial elaboration of the minuscule form by an exaggeration of the second stroke producing a form distinguishable from minuscule and majuscule alike. In this case we have only to make up our minds as to whether the intermediate form is to be represented by upper or lower case, and to treat it accordingly. I may say that I have throughout sought to represent initial forms by lower-case, preferring to err on the side of paucity rather than of redundancy in the matter of upper-case letters. Since, however, it was only during the progress of the work that I became aware of the nature of these initial forms, I am afraid that, in the early sheets especially, a good deal of inconsistency may be found. The second variety causes more trouble ; an instance is the letter $l$. When Henslowe has a number of entries all beginning with $L$ ('Lent' or 'Layd owt') there is noticeable a tendency for other initial $l$ 's to be attracted to the majuscule form. The difficulty of drawing the line in such cases as this will be readily understood, and the compromise by which it has been sought to meet it can scarcely hope to be generally recognised as satisfactory. I have no doubt that I shall on the whole be thought to have erred on the side of the lower case, but having pointed out the difficulties and also the main rules by which I have been guided in seeking to meet them, I may, I think, dismiss the matter as one, after all, of inconsiderable practical importance. I may mention that the question has been occasionally complicated by the occurrence of true capitals, elaborate majuscule letters used at the beginning of memoranda and the like. These have been sometimes represented by upper-case letters of a larger fount.

It is necessary to say a few words on Henslowe's majuscule forms in general. Except in the case of $J$ and $R$, the majuscule forms of which are commonly used initially, and to a less extent of some other letters such as $L$, the majuscule forms must be regarded as more or less exceptional. The natural result of this in an uneducated hand is that the forms are inconstant and in many cases merely imitated from those used by other writers. Different letters are confused. Thus the majuscule forms of $S$ and $C$ are used almost indifferently; there are several distinct forms of $T$, one of which by a further confusion also occasionally does duty for $E$. Unfortunately it was some time before I noticed these confusions, so that the treatment of them in the text is now and then inconsistent. Were I starting afresh I should deliberately disregard the form and render the letter according to the evident intention of the writer only: a form such as 'Somplayneth' should not appear. Henslowe has the usual $f f$ for $F$, and even extends the practice
of doubling the initial letter to represent a majuscule to other letters also ; we find both $s s$ for $S$ and $t t$ for $T$.

I must now add a few notes upon individual letters, and for this purpose append a plate giving the more important forms found in Henslowe's hand. This has been reproduced from copies of letters made by myself with the MS. before me. I may say that after repeated experiment I have come to the
anta $A$ at $l b b b b \frac{z_{z}}{2} B \tau C D$

FORMS OF LETTERS USED BY HENSLOWE.
conclusion that Providence did not intend me to forge old MS. The copies will show the formation of the letters, they must not be taken as accurately reproducing the style of Henslowe's hand. I have not necessarily given all the actual variations to be found whether in the minuscule or majuscule forms.

Of the letter a I have already said what is needed. We find three distinct forms of minuscule, out of the first of which the initial form is evolved, and several variations of majuscule, the simplest and most modern of which is due to the influence of Allyn's hand. In $b$ we have a case in which an initial form is elaborated from
the ordinary minuscule, and this initial form further attracted towards a now obsolete majuscule form which exists by the side of that now current. The letter $c$ is chiefly remarkable for the fact of there being two distinct majuscule forms, the more archaic of which is almost exclusively used to represent the numeral. Of $d$ sufficient has already been said; although a large number of slightly varying forms are found, no clear distinction between majuscule and minuscule can be drawn. With regard to $e$ one or two remarks are necessary. The ordinary minuscule form is quite straightforward, except that finally it has a tendency to disappear, being represented in extreme cases by nothing more than a slight 'kink' in the tail of the previous letter. This is especially the case after $y$ and $h$. I have always printed the definite article as the, and I think that there is usually sufficient justification for doing so, but in other words it is often difficult to say whether it is possible conscientiously to see a final $e$ or not. There is an initial form with a sharp angle at the bottom of the first stroke, which since the upstroke tends to disappear is liable to be confused with a $c$ (see note on $9^{\circ} 26$ ). The simplest of the majuscule forms is again due to the influence of Alleyn's hand. With regard to the minuscule $f$ the only thing to be noticed is that the down stroke is invariably made first and the head, such as it is, added. The letter is duplicated for the majuscule, but in most cases this merely means doubling the tail. There is nothing particular to note concerning $g$; the majuscule form rarely appears, and is probably influenced by the signatures of John Griggs and Gabriel Spenser. Of $h$ there are two minuscule forms, one of which develops an initial variety under the influence of the now obsolete majuscule. The minuscule $i$ is frequently undotted and is rare initially. The majuscule is of the long form which supplies the modern $J$. For this reason it has been represented by $J$ in the reprint, somewhat contrary to recognised usage. The minuscule form is also used in Roman numerals, except for the last figure or for unity, cases in which use is made of the form $j$, which does not otherwise appear. In $k$ we are met with somewhat the same difficulty as in $d$, the minuscule form passing by imperceptible degrees into what in this case is an unquestionable majuscule. The case of $l$ has been already discussed, it is practically the same as that of $b$ except that only one majuscule form is found. It may be noticed that in $l /$ the second letter is frequently made with a wider loop which partially covers that of the first. The sign denoting 'pounds' (whether money or weight) is peculiar. It stands, of course, for libri and may be regarded either as $l l$ or $i i$. In many cases it is undoubtedly $l l$, while in others it has the appearance of $l i$, though the $i$ never appears to be dotted. The two forms have a tendency, however, to merge into each other, and as the apparent li may quite possibly be a degeneration of $l l$, I have adopted this latter form throughout. ${ }^{1}$ I

[^8]may note that in this case the $l$ or $l l$ is almost invariably crossed, which is otherwise rare. It has not been thought worth while preserving this peculiarity in the reprint, since the writer does not appear to have attached any significance to it. The $m$ when final frequently has a tail drawn indifferently up or down. In the former case it may occasionally represent a contraction mark, but is quite inconsistently used. When exaggerated the upward curl makes the letter liable to be mistaken for $n d$. In $m^{n}$ the $m$ is sometimes made rather larger, and may have been intended for a majuscule, though as no difference appears in the form it has bsen rendered by a lower-case letter. In Henslowe's hand the true majuscule is practically only found as a capital. Exactly the same remarks apply to $n$. The only thing to be noted concerning $o$ is that after $t$ it tends to degenerate into a slight curl at the end of the cross stroke. There appears to be no majuscule form. The minuscule $p$ is a little liable to be confused with $x$; it is sometimes duplicated by means of a double tail. The crossed $p$ and the $p^{r}$ are incorrectly used as equivalents, and stand indifferently for pre or per, par, etc. The crossed $q$ standing for $q u a r$ is either an adaptation of the Latin contraction $q_{3}$ for $q u e$, or a combination of $q$ with one of the $r$-contractions. As I have already said $r$ tends to degenerate into a simple minim ; between $e$ and final $s$ it tends to disappear altogether. The minuscule form is not used at the beginning of a word more than two or three times in the whole MS., I think ; the majuscule supplying the place of the initial form. The majuscule even occurs medially. The contraction rendered by a small raised lower-case letter, as in $m^{r}$, appears to be a form of the $r e$-contraction improperly used ; it stands indifferently for $r, r e$, and $e r$, and is found both medially and finally. Another contraction ' 3 ' stands for $c r$ and usually only appears finally. The crossed majuscule ' $R$ ', standing for 'received,' is carefully differentiated from the ordinary form, though it looks very like a simple modern $R$. As in $f$, so in the long $s$ used initially and medially, the down stroke is made first and the head added after. In ss, which sometimes takes the place of the majuscule, the tail only is as a rule duplicated. The tail of the final $s$ is usually elaborated when it stands for 'shillings,' or properly, of course, solidi. The es-contraction ' $e$ ', is also used finally, but though I have retained it in the text it is clear from his frequently writing an $e$ before it, that Henslowe, like many other writers of the end of the sixteenth century, merely regarded it as a form of final $s$, and not properly as a contraction at all. When $t$ is doubled, as it sometimes is in place of the majuscule, the two down strokes are usually traversed by a single cross stroke. In the combination It it is not uncommon for the cross stroke to traverse both letters, which sometimes leads to trouble. The forms $u$ and $v$ are used absolutely indifferently in all positions ; $u$, however, has no majuscule form. Although in some cases in which a $w$ is more carefully formed, a majuscule is clearly intended, no real difference of form can be traced. The $x$, of course, most commonly appears in numerals. In
the termination $r v$ the $r$ is apt to become merged in the $y$, but as it is impossible to say whether it is the $r$ or part of the head of the $y$ that has disappeared, I have treated it as though both letters were traceable. A queer contraction for the which frequently appears is evidently a conventionalised form of $y^{e}$ and has been rendered as such. The letter $z$ is practically indistinguishable from the 3 -contraction. The numerals present few peculiarities: $I$ is frequently dotted by analogy with the Roman form, but this peculiarity has not been reproduced; $o$ when carelessly formed is apt to be confused with $I$, and 3 sometimes tends to become indistinguishable from 7. I may remark finally that I have had some difficulty with the position of the letters indicating pounds, shillings, and pence. They are written indifferently on the line, raised, or above the figure. Being forced to normalise the use I have always printed these raised except where the numerals were separated by short dashes. This being the arrangement adopted for columns of figures I have in that case, where space allowed, placed the letters above the figures.

I am afraid that this long analysis will not have much interest for the general student. I have, however, so often in the course of my work been forced to conventionalise the MS. forms, that for conscience sake I am driven to a somewhat lengthy exposition of the possible sources of confusion in the deciphering of Henslowe's at times erratic hand.

## § v. Other Hands appearing in the Diary.

The forestry accounts, as we have already seen, are with one or two exceptions in the handwriting of John Henslowe. I am now concerned only with those portions of the MS. which refer to Philip Henslowe's affairs, whether personal or dramatic. In these, apart from Philip Henslowe's own hand, concerning which enough has already been said, are found the autographs, often merely signatures, of sixty-three different persons, of which all but seven can be identified with reasonable certainty. These are all indicated in the notes to the present volume, but for the sake of convenience I have here collected the references into an alphabetical list, adding such remarks as seemed likely to be of use to students. ${ }^{1}$
Alleyn, Edward. The entry at $13^{\mathrm{V}} \mathrm{I}-7$ is in his hand except for Davis' mark. ${ }^{2}$
${ }^{1}$ I distinguish between autograph entries, whether signed or not, and mere signatures. The words 'By me' or 'Witness,' etc., are, however, treated as part of the signature. The reference to a line indicates that autograph writing is to be found in that line, not necessarily that the whole line is autograph. Further particulars will be found in the notes.
${ }^{2}$ Collier (p. 59) notes: "This is Edward Alleyn's own signature, the first time it has occurred in the MS. The body of the memorandum is not by him." His failure to recognise Alleyn's hand is astonishing, considering that he had the entry cut out from 231 in his own possession and had printed it as autograph in 1831. In editing the Diary, however, he appears to have totally forgotten everything he had said çoncerning it in his earlier work.

The only other signed entry known to have been made by him in the Diary is now in B.M. MS. Egerton 2623, f. 19; it was formerly part of folio 231. ${ }^{1}$ His signature appears very frequently, but in the majority of cases it is not in his own hand, but an imitation, often very close, by Henslowe. The following alone can be pronounced autograph: $387,42^{v} 5,7229$ (probably, though it offers curious points of difference from the others ${ }^{2}$ ), $858,90{ }_{17}-18$, 98 го (probably), $1018,102{ }_{15}-16, \mathbf{1 2 9}^{\vee} 22$ (probably). ${ }^{3}$ In all these cases the name is spelt 'Alleyn,' except in 387 where we find 'Alley.' The signature 'Edward Allen' in $\mathbf{3}_{12}$ is certainly written by Henslowe ('alen,' though unusual, also occurs in the record of his marriage in 25 ), but it should be noticed that Dr. Warner has declared the signature 'Edward Allen ' on a letter from R. Raye to Henslowe to be autograph. (Young, iI. 328.) Where the initial only precedes the surname it is interlaced with the A .
Birde, William (alias Borne). Entries, $3^{\text {v }}$ 16-19, 67v $^{\text {v }}$ 10-12 and 24-27. Signatures, 42 II $44^{v} 24,708,89^{v}$ 19. Where the initial alone precedes the surname it is interlaced with the $\mathbf{B}$.
Blackwood, Thomas. Signature only, $120^{\vee} 2$ I.
Borne, James. Entry, $5^{\text {v }}$ I-5.
Bowes, Ralph. Signature only, $72^{v} 8$.
Bradshawe, Richard. Signature only, 857
Bristow, Thomas. Entry 61 ${ }^{\text {v }} 2-6$.
Carter, Ra. Entry, $\mathbf{3 8}^{v}$ I-6.
Chaloner, Thomas. Entry, 19 22-26.
Chapman, George. The entry $90 \mathrm{I}-8$ is in his hand and signed with his name. ${ }^{4}$ The signature differs, however, from the entry, being in an Italian instead of an English hand. Another signed entry in his hand, now B.M. MS. Addit. 30262, f. 66, was formerly in the Diary. ${ }^{5}$ The entry is in the same hand as the above, but in this case the signature is in the same hand as the entry.
${ }^{1}$ See p. xlix.
${ }^{2}$ As joint witness with W. Henslowe to a copy of a letter from P. Henslowe to Vaughan. Collier (p. 177) notes: "These are not original signatures: the handwriting is the same as that of several letters preserved at Dulwich." This vague reference is useless. The two signatures are certainly in different hands and neither the same as the text of the letter, which is by P. Henslowe. In spite of obvious differences between this signature of Alleyn's and the others in the volume, it is with some confidence that I enter it as autograph.
${ }^{3}$ Collier (pp. 71 and 104) adds three others to the list of autograph signatures, namely, $19^{V} 5$ and 375 and ro. In no case am I able to agree with him.
${ }^{4}$ Collier (p. 191) notes: "The signature only is in the handwriting of Chapman." The mistake was a natural one, and would suggest that he had not seen the excised slip.
${ }^{5}$ See p. xlix. It is impossible to say exactly where it belonged.

Chettle, Henry. Entries, $296-7,29^{\mathrm{v}} \mathrm{I}-3,31 \mathrm{I}-2 \mathrm{I}, 62 \mathrm{I}-5,100_{\mathrm{v}}^{\mathrm{I}} \mathrm{I}-3$. Signatures, $68^{v} 28,693$.
Clyfton, Robert. Signature only, 1008.
Day, John. Entries, $298-10$ and $12-13,31$ 12-15. Signatures, 295 (initials only ${ }^{1}$ ), 82 I8. The note $69{ }^{16-17}$ is not in Henslowe's hand like the rest of the entry, and was most probably added by Day. ${ }^{2}$ His writing and even his signature appears to have varied considerably.
Dekker, Thomas. The only signed entry now in the Diary is $101 \mathrm{I}-7$, written in a rather ornate Italian hand. Another signed entry which was once in the volume is now preserved in B.M. MS. Addit. 30262, f. $66^{v}$, and this is in an English hand of a very different appearance. ${ }^{3}$ This entry in an English hand further enables us to identify the unsigned entry $1141-14$ as by Dekker. Signature, 3123.
Dorington, John. Entry, 151 I-5.
Downton, Thomas. Entries, $30^{v}$ I-4, $40^{v}$ II-I 3,42 5-10, 46 I-5 (except signature), $64^{v} 14-16,656-12,65^{v} 5-9$ and $14-18,665-8$ and $25-28,66^{v} 20-24$, 106 I8 (possibly). Signatures, 42 I $3,44^{\vee} 23,707,85$ I8.
Drayton, Michael. Entry, 31 I-6; but this can hardly be Drayton's usual hand.
Duke, John. Entry, 83 12-19.
Griggs, John. Entry, 12 1-16. Signature, $98^{v} 10-11$.
Harris, William. Signature only, 89v 3I-2.
Hassard, Robert. Entries, $83^{v} 8-1$ I, 100 I5-1 8.
Hathway, Richard. Entries, $31^{v}$ 19-23, 100 9-13 (Smith's name in I. 14 may also be in Hathway's hand). Signature, 465.
Hatto, William. Entry, $23^{v}$ 15-21.
Haughton, William. Éntries, 29 I-5, $30^{v} 8-\mathrm{I} 2,318-1 \mathrm{I}, 68^{v}$ 20-23, 82 14-18. Signatures, 29 II, $3122,68^{v} 19,69^{v} 3$. The signature at 68 i6 is neither autograph nor by Henslowe. It may be by Shaa.
Henslowe, William. Signatures only, 19 21, $7228 .{ }^{4}$
Herne, Phillip. Signature only, $28^{v} 10$.
Jeffes, Anthony. Signature only, 70 II.
${ }^{1}$ Collier (p. 92) notes: "The entry is in the handwriting of Haughton, who also added the initials of John Day." I do not think so.
${ }^{2}$ Collier (p. 170) notes: "This addition, after the signature of Day, was made by Dekker." I suppose he intended to imply that Day's signature was autograph. The entry is rather puzzling. The words 'by . . . vse' are in an English hand, the rest in an Italian. These latter can hardly be in any hand but Day's, certainly not in Dekker's. Of Day's English hand, no undoubted specimen occurs in the Diary, but as the first words are obviously continuous with what follows, we can hardly suppose them written by a different person. (cf. also Dulwich MS. I. 34.)
${ }^{3}$ See p. xlix.
${ }^{4}$ See above p. xxi, note 2. In spite of certain differences, I have little hesitation in treating both W. Henslowe's signatures as autograph.

Jeffes, Humphry. Signatures only, 44 28, 709.
Johnson, Robert. Entries, $23^{v}$ 1-14 and 22-27.
Jones, Richard. Signatures only, $44^{\mathrm{V}} 25,70 \mathrm{II}$.
Jubey, Edward. Signature only, 70 Io.
Langworth, Arthur. Entry, 88 2-I 5 .
Lawrence, Thomas. Signature only, 1599.
Lyngare, William. Entry, 98 I-9.
Massey, Charles. Entry, 24 ${ }^{\text {y }} 3-4$. Signature, $44^{\text {y }} 24,7012$.
Maulthouse, John. Entries, 22 I-4 and 20-23, 38 I- 6.
Paschall, William. Entries, 90 9-16, $90^{v} 1-5,102$ I-14, $111^{v}$ I-14.
Playstowe, William. Entries, 81v 18-27, 82 3-1 3, 83v 1-7, 101 Iо-14.
Porter, Henry. Entries, 306-1 I, 62 7-9. Signature, 305.
Rankins, William. Signature only, $31^{v} 23$.
Ross, Charles. Signature only, $13113 .{ }^{1}$
Rowley, Samuel. Entries, 65 13-16 and 22-24. Signatures, 44²5, $67^{8 v} 32,7013$, 85v 27, 1019.
Shaa, John. Signature only, $65^{v} 25$.
Shaa, Robert. Entries, $36 \mathrm{I}-3,65 \mathrm{I}-5,66 \mathrm{I}-4,6^{v}$ 16-19 and 25-28, 67 3-6 and $2 \mathrm{I}-24,67^{\mathrm{v}} 3-5,6824-34,68^{\mathrm{v}} 6-12$ and $3 \mathrm{I}-36,69 \mathrm{I}-2$ and $25-32,69^{\text {v }} 8-1 \mathrm{I}$ and 28-35, 70 I-4, 104 17-26, 1089 and 20 (probably), ${ }^{2} 112$ 13-25, 131 i-12. Signatures, $\mathbf{4 4}^{v}{ }^{2} 5,626,6820,706,131$ I4. The signature ' william haughton' at 68 I6 is neither autograph nor by Henslowe; it may be by Shaa.
Singer, J. Signatures only, $44^{v} 22,705$. The initials are interlaced.
Smith, Wentworth. Signature only, 100 I4. (It is possible that this may be in Hathway's hand.)
Spenser, Gabriel. Signatures only, $4032-33,42$ 12, $44^{\vee} 26$.

Wallis, Richard. Entry, ${ }^{168{ }^{v}}$ I-4.
Welles, Robert. Signature only, $\mathbf{1 2 7}^{\mathrm{v}}$ I 5. (It is just possible that the whole entry 11. $1-15$ is in his hand.)

Williams, Kenrick. Entries, $96 \mathrm{I}-6,9^{v}$ i-30.
Wilson, Robert. Entries, $6525-3 \mathrm{I}, 81^{\mathrm{V}}$ I-7. The initials are interlaced.
Woodward, Frances. Entry, 129v I-I4.
${ }^{1}$ Collier (p. 267) notes: "The whole of this memorandum is in the handwriting of Charles Rose, or Rosse, for he spells his name differently in the body of the paper and in the subscription." I believe on the contrary that the body of the memorandum is in Shaa's hand.
${ }^{2}$ Of the second of these Collier (p. 228) notes: "A blank was left for the name of the piece, which was subsequently filled in by Day." I do not think that this can be so.

There are, as I have said, seven entries of which I have been unable to identity the handwriting. ${ }^{\text {. }}$ These include : a portion of the charms, 17 11-33; two copies of a receipt to Henslowe from Hugh Wren on behalf of John Maulthouse, 22 5-19 (the first is a rough draft, and the handwriting has a very different appearance, though probably the same) ; an unsigned memorandum relating to a payment to Arthur Langworth, $25 \mathrm{I}-9$; the words 'Troyeles and creasseday' scribbled at the top of $61^{\text { }}$; the memorandum of payment by Birde to Henslowe, signed by Henslowe and witnessed by William Harris, 89 $23-29 ;^{2}$ a fragmentary entry of a bond of John Wilson, 162 I-3 (the first words of this appear over and over again in Henslowe's scribble throughout the volume) ; a memorandum of agreement between Robert Welles and Henslowe signed by the former, $12 \boldsymbol{7}^{\vee}$ I-14 (it is just possible that this is in Welles' hand). ${ }^{3}$

The following marks of illiterate signatories also occur in the volume: Hugh Davis, as joint signatory with Alleyn of an appraisement, 13" 6 ; Michael Bluenson, to a receipt on behalf of the Master of the Revels (Edmund Tilney), 20" 4 ; Hugh Wren, on behalf of John Maulthouse, to a receipt to Henslowe in an unidentified hand, 2219 ; James Ross and George Dixon to an assumpsit for the production of a bitch of William Dixon's (for bear-baiting) before the Queen, $97^{\text {v }} 15$ and 16 ; John Olfelld (or Oldfield), as witness to the above, $97{ }^{\mathrm{v}}$ 19; Joan Alleyn ('edward allenes wiffes marke'), as joint witness with her husband to a memorandum of promise of payment to Henslowe by Arthur Langworth, 98 го; John Ockey, to a memorandum of indebtedness to Henslowe, 112 10; Nicholas Dame, as witness to the above, 112 12. It will be seen from the facsimile of these marks here given, that they may be divided into two classes. To the first belong those of Ockey and Dame, who make crosses, and of Davis, Ross, Dixon, and Oldfield, who use conventional signs. The others are more elaborate. Michael Bluenson uses a monogram of his initials followed by a sign which most likely stands for a $v$. This mark supplies us with a hint for the deciphering of the remaining two. That of Hugh Wren may fairly certainly be read as ' $h$ w', while in Joan Alleyn's it is not difficult to see with the help of a little imagination the initials 'J A'.

Before leaving the question of autograph entries in the Diary, I must call

[^9]attention to a remarkable discrepancy which appears between certain statements of Collier's in his History of Dramatic Poetry, and his edition of Henslowe's Diary. In the latter we read, in a note on p. 260, that "the original signature of Anthony Monday nowhere occurs in the MS. in its present state." Of the truth of this statement I can vouch; the name occurs repeatedly, but it is invariably in Henslowe's hand. In his History (1831, III. 92), however, he blames Malone for

MARKS OCCURRING IN HENSLOWE'S DIARY.
omitting Munday as part author of Cardinal Wolsey, adding, "That he was concerned in Cardinal Wolsey, we have under his own hand, as he signs, as follows, a receipt for money on account of it:" and he then appends a facsimile of the signature. Such an entry would be of the greatest interest if it existed, but at present no trace can be found of it in the MS. The facsimile of the signature has very little resemblance with the specimen preserved in the British Museum (MS. Addict. 33384, f. $2^{v}$ ), but it would not be safe on that ground to conclude that the xxxy
whole was a fabrication. ${ }^{1}$ Furthermore, although Collier is right in stating (History, 1831, III. 90) that Chettle appears as part author of the Famous Wars of Henry $I$, no entry of the play now extant is subscribed with his name, and the facsimile given is distinctly unlike any signature of his now found in the volume. ${ }^{2}$ Lastly, in the list of writers employed by Henslowe (1831, III. 106) appear two names, Robert Lee and Hawkins, which I have been unable to trace elsewhere. It is impossible not to be struck with the coincidence that we have evidence here of at least three entries having been in the MS. in 1831, which are not to be found there to-day, and that, according to the entry in the Governor's PrivateSittings book already quoted, three of the leaves now mutilated were intact when the volume was entrusted to Collier in 1840. It is in any case a singular fact that when editing the volume in 1845 Collier should have made no mention either of the presence or the absence of certain important entries which fourteen years previously he had censured Malone for overlooking.

## § vi. The Forgeries.

Ever since the publication of Dr. Warner's Catalogue in 1881 it has been matter of common knowledge that a number of entries in Henslowe's Diary are modern fabrications. The entries condemned as spurious by Dr. Warner amounted in all to eight, one further one was pointed out by C. M. Ingleby, and I have unfortunately to add yet further to their number. ${ }^{3}$ As to the authorship of the forgeries I may be allowed to quote a few of the words in which Dr. Warner marshalls the evidence as regards the MSS. treated of by him in his Catalogue. "This is not," he says, "a controversial work, and the subject cannot be adequately discussed without going beyond the Dulwich collection and bringing into evidence the entire system of closely analogous impostures which found their way into print in the second quarter of the present [nineteenth] century. Although it is impossible

[^10]to ignore the fact that Mr. Collier, who gave them to the world as genuine matter, has been distinctly charged with their fabrication, it is no part of my duty either to arraign or defend him. . . . If Mr. Collier's name has been specially prominent, the blame rests with himself. Even on the most charitable supposition, the ease with which he allowed himself to be imposed upon argues the most extraordinary carelessness and incapacity. On one point I think no doubt need be entertained. Although the style of the handwriting adopted varies considerably and exhibits different degrees of imitative skill, my own decided opinion is that all the forgeries here were executed by one and the same person, whoever he may have been.

After Malone's death there is nothing to show whether any one used the MSS. before Mr. Collier; ${ }^{1}$ but, while the earlier forgeries need not be anterior to the date 1831 [that of Collier's Hist. Dram. Poetry], the most recent may be as late as 1845 [that of his edition of Henslowe's Diary], or, in the case of Alleyn's Diary, later still. At the most, there could only have been a very few persons who had access to the collection, and who, at the same time, were keenly enough interested in dramatic history [or, one may add, sufficiently conversant with it,] not to shrink from actual fabrication in order to support particular theories or to have the credit of discovering new facts of professed importance." ${ }^{2}$

This necessarily guarded and justly cautious statement of facts was supplemented in 1887 by the same writer's article on Collier in the Dictionary of National Biography, where in a weighty summing up he declares emphatically for Collier's authorship of the forgeries. On the evidence, indeed, no other verdict is conceivable.

If Dr. Warner held it impossible to discuss the question adequately without going beyond the Dulwich MSS., so much the more unjustifiable would it be to form an opinion upon the evidence offered by the Diary alone, and I, who am at present concerned but with that one document, am consequently relieved of the responsibility of stating and defending an opinion on the subject. The controversy is, however, by this time a thing of the past, and it is as a fact of history supported by overwhelming evidence and accredited by the most trustworthy authorities, that I accept Collier's authorship of the strange tangle of dishonest fabrication. No extenuating circumstances can be pleaded on behalf of a man who thus abuses his powers and his opportunities, and to condone his action would be in no unimportant sense to make oneself a party to his misdeeds. Nevertheless, whatever the blot it leaves upon his character, whatever suspicion it necessarily throws, not only over his own work, but over all documents that passed through his hands, it cannot affect the vast knowledge of which he stood possessed, nor the respect
${ }^{1}$ We now know from the Private-Sittings Books that the MS. was lent in 1819 to the then Archbishop of Canterbury, Charles Manners-Sutton, but we can hardly suppose that worthy and amiable primate to have heen possessed of the requisite knowledge for the perpetration of the forgeries in question.
${ }_{2}$ Warner, p. xlv.
which that knowledge, and his very real services to the study of English letters, claim from us of right. It is not easy to forgive a man of his learning and ability for placing himself at the mercy of every insolent and ignorant scribbler who may choose to arrogate to himself the functions of moral censor. Much as we may condemn and regret the means to which he resorted in his work, the aim of his life was surely not a mean one.

The following is a complete list, so far as my knowledge extends, of all such entries made in the Diary in ink as can be condemned as modern, whether their intention was fraudulent or not. ${ }^{1}$ In every case in which I have had occasion to question the genuineness of an entry I have submitted it to Dr. Warner, as the expert best qualified to speak upon this particular subject, and I have his permission to state that every entry condemned in the following list has been recognized by him as spurious. ${ }^{2}$

$$
\begin{aligned}
& \text { A. } 11^{v} 46 . \\
& y^{\mathrm{e}} 18 \text { of maye } 1595 \text {-Ry at galfrido \& Bernardo . . . . . xxxjs }
\end{aligned}
$$

To this Collier (p. 52) appended the note: "An entry omitted to be noticed by Malone. It relates to a play founded, doubtless, upon the recently-discovered poem by John Drout, entitled 'The pityfull Historie of two loving Italians, Gaulfrido and Bernardo le Vayne,' printed in 1570 by Henry Binneman. It was formerly supposed (from the entry in the Stationers' Registers, which was all that was known of it) to relate to the incidents of Romeo and Juliet, but such is not the fact. An impression, limited to twenty-five copies, has been recently [1844] made from the original." Dr. Warner rightly identifies the editor of this reprint with Collier himself, on the evidence of an inscription in the B.M. copy. Collier, indeed, acknowledges the fact in his Extracts from the Registers of the Stationers' Company (I. 228, and II. 13, 1848-9). The names do not, however, occur in the Register, and the original of the poem printed by Collier, the genuineness of which the present entry has been forged to support, has not yet come to light. It will be noticed that in 1845 Collier had already printed the poem, and was aware of an entry in the Stationers' Register apparently referring to the same piece. Yet in 1848, in printing the first volume of his Extracts from the Register, he identified

[^11]Drout's supposed composition with 'a ballett intituled of ij faythfull fryndes beyng bothe in love with one Lady' entered to Colwell in 1569-70, and it was not till he published the second volume in the following year that he repudiated this identification in order to connect the poem with 'a boke the petifull history of ij lovyng Italyons' entered to Bynneman in 1570-71, although this is obviously the entry he must have had in mind when writing in 1845. I can only suppose that the first identification was a deliberate blind. As to the entry in the Diary Dr. Warner writes ${ }^{1}$ : "This is written at the very bottom of the page in a style of hand which appears nowhere else in the volume. . . . Mr. Collier does not remark in his note that the 18 May, 1595 , was a Sunday. This fact, however, added to the suspicious appearance of the entry, is significant ; for, although in other parts of the volume there is some confusion in the dates, the accounts for the season from Easter to the end of June, I 595, are very regularly kept, and there is no other instance of a Sunday performance." I may add that the entry does not appear in Malone's transcript.
B. $19^{v}$ I3-16.
pd vnto Thomas dickers the 20 of desembr 1597 for adycyons to ffostus twentie shellinges and fyve shellinges more for a prolog to Marloes tambelan $\mathrm{xxv}^{6}$ so in all J saye payde twentye five shillinges ... .
Collier has no note to this entry in his edition of the Diary, but he quoted and commented upon it in his History of Dramatic Poetry (I83I, III. II3). He there adduces it as one of three pieces of evidence in favour of the Marlowan authorship of Tamburlain. The others are Heywood's prologue to the Jew of Malta in 1633, which is ambiguous, and a passage in Harvey's New Letter in 1593, which though dreadfully obscure is nevertheless valuable. The present entry is a patent forgery "written in clumsy imitation of Henslowe's hand." Dr. Warner further adds: "The forger, however, has shown some skill in his treatment of a narrow blot or smudge which intersects the upper part of the ' 11 ' in the second 'shellinges'; for, in order that the writing may appear to be under, and not over, the old blot, he has at first carried up the $l l$ (as if writing $u$ ) only as far as the lower edge of the blot, and has then started again from the upper edge to make the loops."
C. $20^{v} 6$.

> mihell $\mathrm{MB}^{v}$ Blvenson
> marke
> $\quad$ downton

The name 'downton' is a modern insertion copied from its occurrence in line 9 .

[^12][^13]The hand, however, is not much disguised, and it may be doubted whether, considering its want of significance, it was inserted with any fraudulent intention. Collier notes (p. 72): "Downton's name has been added as a witness, but without his Christian name, Thomas ; and it is not in his own handwriting."
D. $29^{v} 4^{-6}$.

Lent the 14 may I 597 to Jubie vppon a notte from Nashe twentie shellinges more for the Jylle of dogges w $^{\text {th }}$ he is wrytinge for the company
The handwriting in this and the two following entries closely resembles that of B, and in all four the ink has been "plainly doctored to give it a fictitious appearance of age." Immediately above the present entry a slip the whole width of the page, has been cut out, and upon this slip, according to Dr. Warner, the same memorandum had been previously entered. "This," he writes, "is evident from an examination of the edges above and below the excision, on which may still be seen the top of the $L$ in the first line and the bottoms of the long strokes in the last line, corresponding exactly with the letters in the entry below." The inference is, of course, that the first attempt at the forgery was unsuccessful. This may very likely be so, though for my own part I find some difficulty in tracing the exact correspondence of the remaining traces of the excised entry with the letters of the extant one. In any case it should be noted that the strip cut out would not be wide enough to contain the latter, and that therefore if it contained the same entry it must have been written in a smaller hand. Four similar excisions have been made between this entry and the next, possibly for the same reason. Of the entry immediately above the excision on $29^{v}$ Collier writes (p. 93): "Other entries, preceding and following this (which is in Chettle's handwriting), are crossed out, and part has been cut away." This can only be intended to mistify the reader, for though it is true that the last entry on the recto is crossed off, the following one is Collier's own forgery and is not crossed off. Upon the forged entry itself Collier notes (p. 94): "At this date, $14^{\text {th }}$ May I 597, Nash was writing his play of the Isle of Dogs for Henslowe. A subsequent memorandum, dated 23d August 1597, shows that he was then in confinement in the Fleet for having composed such a piece, which had been acted." The only genuine mention of the play to be found in the Diary is at 23212.

## E. 33 5-9.

pd this 23 of aguste 1597 to harey porter to carye to T Nashe nowe at this tyme in the flete for wrytinge of the eylle of dogges ten $\mathrm{x}^{8}$ shellings to be paid agen to me when he canne J saye ten shillinges

From the upper portion of the leaf a strip $13 \frac{3}{4}$ inches wide has been cut out, most probably on account of an unsuccessful attempt at a forgery. In making the present entry Collier chose a part of the page, near the bottom, which corresponded with a blank on the verso (now occupied by the next forgery).
F. $33^{v}$ 2I-4.

This is, so far as ink and handwriting are concerned, the most clumsy forgery in the volume. It should also be noticed that the forger has made a blot at the end of 1.13 on the same page.
G. $477^{v} 8-9$.
lent vnto $w^{\mathrm{m}}$ borne the 14 of July 1598 for
to geue the paynter in earneste of his picter
the some of . . . . . . . . . . . . . . . . . . .
The words in the margin are entered in an undisguised modern hand. I have little doubt that they were written by Malone, for they bear a close resemblance with a note found against the same entry in his transcript: ' Probably for the play called Tasso's Melancholy.' This conjecture rests upon the mention of 'Tasso picter' in the inventory of the Admeral's men's properties dated March 10, 1598 (i.e. I 598-9?), printed by Malone (Collier, p. 273). Collier noted (p. 127): "This entry might look as if scenery had been employed; but it was payment for a portrait used in the course of a play: in another hand, in the margin, we read 'Tassoes [sic] Picture.'" He does not appear to have noticed that it was an obviously modern addition.
H. 6113.

$$
\text { pd of his deate in his boocke of plasidas . . . . . } \mathrm{x}^{3}
$$

I. $61^{v} 17-18$.

Lent vnto cheattell for Sir plasidas
the 9 of Aprell 1509 the some of . . $\mathrm{x}^{8}$
These forgeries have not been noticed before, and are certainly among the best in the volume. The colour of the ink has been imitated with unusual success, but a careful examination of the forms of the letters leaves no doubt as to their nature. Upon the former Collier writes (p. 149): "Malone takes no notice of this entry, which shows that Chettle had contrived to make a play out of the dull incidents of the legend of Sir Placidas, upon which John Partridge had written and printed a poem in 1566,8 vo. It is mentioned again afterwards." Partridge's work is
entitled 'The Worthie Hystorie of the most Noble and valiaunt Knight Plasidas': it was afterwards reprinted by Collier in vol. III. of his Illustrations of Old English Literature, 1866.
K. $644^{v} 7$.

Originally both the author's name and the title were left blank, then the former was inserted in the form 'maxton,' while the latter remained as it was. The interlineation ' $m$ r mastone' is in different ink and a different hand, and certainly has the appearance of a forgery, though it has not hitherto been condemned. It should be remarked, however, that Malone's transcript, though giving no indication of the interlineation, reads 'Mastone' in place of 'maxton.' There is no unlikelihood in 'maxton' standing for Marston, who certainly was a 'new poete' in 1599, since his earliest works belong to the previous year, but it does not appear possible to identify the unnamed play with any of his extant works. Collier notes (p. 156): "The name, ' Mr. Mastone,' is interlined in a different hand, in order to correct the mispelling of 'Maxton'; but neither was right, 'the new poet' being, no doubt, the celebrated John Marston."
L. 9432 .

Lent vnto $w^{\text {nu }}$ Jube the 3 of novmb ${ }_{3}\binom{1601}{$ Wesster }
bye stamell cllath for a clocke for the gwisse Webster $^{\text {iij }}$
the some of
In his History of Dramatic Poetry (183I, III, 101) Collier quotes the present entry, remarking that it "sufficiently connects Webster with the performance, which we may conjecture was a new version of Marlowe's tragedy." In his edition of the Diary (p. 202) he notes : "The name of Webster is interlined, perhaps in a different hand; but there is little doubt that this distinguished dramatist at this date either re-wrote, or made some extensive alterations and additions to, Marlowe's ' Masacre at Paris:' in the next entry it is called by Henslowe, not 'the Guise,' as in the memorandum before us, but 'the Massacre of France.'" The interlined name, which does not appear in Malone's transcript, is a palpable forgery, and a line below it, perhaps intended as a caret mark, has evidently been inserted at the same time. Dr. Warner writes (p. xlii): " The forgery of Webster's name, which is written above the word 'gwisse' or 'Guise,' was not a success; and even Mr. Collier remarked that it was 'perhaps' in a different hand. But, badly executed as it is, it seems to have been the result of a second attempt, for below the line are unmistakable
traces of an erasure, so carefully made and smoothed over as scarcely to be detected except from the thinness of the paper." I may add that the erasure has carried away a portion of the bracket or brace at the end of the line.
M. 956.

Lent at the apoyntment of the company \& my sonne vnto hary chettell in earneste of a playe called to good to be trewe $\begin{gathered}\text { or northern Man } \\ \text { the some of }\end{gathered}$ the 14 of novmb 31601
The words interlined, which are in a different ink and hand from the rest of the entry, and do not appear in Malone's transcript, are unquestionably spurious, though the forgery has not hitherto been exposed. Collier notes (p. 204): "Doubtless, a comedy upon the story of 'the King and the poor Northern Man, or too good to be True.' In other entries the play is called only 'Too good to be True.' An old poem on this subject was reprinted in 184I for the Percy Society." This is one of the most disingenuous notes in Collier's volume. The poem which he had himself edited for the Percy Society in 1841 is by M[artin]. P[arker]., whose earliest work dates from about 1628 , and is entitled in the edition of 1640 , from which Collier reprinted, 'The King and a Poore Northerne Man. Shewing how a poore Northumberland man,' etc., without any mention of 'Too good to be True.' The addition being a forgery there is, of course, no reason to connect the two pieces at all.
N. 109 16-1 7 .

Layd owt at the apoyntment of thomas Hewode in earneste of a playe called Like quits Like vnto $\mathrm{m}^{\mathrm{r}}$ harey chettell \& thomas $\mathrm{xxxx}^{8}$ Hewode the 14 of Janewary 1602 some of

A space was originally left for the title. Of this fact the forger has availed himself to insert the words printed in italic above. They do not appear in Malone's transcript. Collier has the note (p. 230): "It is just possible that this may have been a play on the same story as Measure for Measure, near the end of which this line occurs-

## 'Like doth quit like, and Measure still for Measure.'

The success of Measure for Measure at this date might have produced the rival play. As has often been the case, the title of the piece was clumsily filled in by Henslowe after he made the entry." This forgery was one of the two pointed out by Ingleby. He writes: "The word 'Like' in the first line has been written on an erasure, and part of the erased word is still legible. Henslowe not unfrequently made an entry in his accounts, leaving a long blank for the name of the play for xliiii
which the advance of money was made. Then, on a subsequent occasion, he entered the name of the play; and if it was a single word, he inserted it at or towards the end of the blank, so as to leave a vacant space before the name It is evident to me that the writer of the spurious entry found an unusually long blank before the little word which stood as the name of the play, that he wetted his finger and erased that little word, and then wrote over the whole blank the title of an imaginary play." Since the blank was divided between the two lines Ingleby's remarks hardly seem to fit the case. If, as he says, the erasure was in the upper line, the original 'little word' cannot have been entered 'towards the end of the blank', for even the shortest title would have filled all the blank there was in that line. There is, however, absolutely no trace of any erasure at all, and I can only imagine that Ingleby, writing from notes made when he had the MS. before him, somehow got confused between two different entries.
O. 1166 .

Lent vnto harey chettell the 7 of septmb3 1602 at the apoyntment [to lend] in earenest of a $x^{8}$ [tragedy] called Robin hoodfellowe some of
P. 116 II- 12 .

Lent vnto harey chettell the 9 of septmb ${ }_{\text {playe }}$
1602 in pt of payment of a [tragedie] $x^{8}$ called Robingoodfellowe some of

In both these cases a space was left blank for the insertion of the title, and so remained until the forger supplied the omission. In the first case an $h$ has been written in place of a $g$. This, since the old $h$ was often much the shape of a modern $g$, would be an easy slip for a forger to make, though an unlikely one to occur in a genuine entry. Collier notes (p. 239): "The werd 'tragedie' originally followed 'in earenest of a,' but it was struck out when Henslowe found that it was not a piece of that description. In the other entry regarding the same production, the word 'tragedie' was erased and 'playe' written over it. No doubt this was done at a subsequent time, as the ink in which the correction is written is of a different colour. Malone takes no notice of these remarkable entries." The alterations mentioned, are, like the insertions, the work of the forger, and no trace of either is to be found in Malone's transcript.

This ends the list of forgeries which have so far been detected. But there are also certain erasures which demand notice here. In the first place I may call attention to one on $\mathbf{1 0 2}^{\mathbf{v}}$, where after 1.7 a signature has been clumsily obliterated. This I think is most likely to have been an unsuccessful attempt at a forgery, but it is of course not impossible that it may be an old erasure like that at 1422 . The xliy
other two I have to mention are unquestionably the work of Collier. The first of these occurs at 86 , which now reads :
ne . . . R7 at a knacke to knowe a knave 1592 .' . . . . . . . . . . iij" xij".
On this Collier notes (p. 28): "This is a remarkable entry, as Henslowe states that it was the first performance of this celebrated play, which was printed in 1594, and which the Shakespeare Society propose to reprint. 'I day' is interlined, perhaps, in order to give the information of its original production, but it escaped Malone's notice : $n e$ is also in the margin, but Malone did not ascertain the meaning of that note." In Malone's transcript the interlineation reads, not 'I day,' but ' 10 day,' and on close inspection it will be seen that a $o$ has been erased in the original. Henslowe having accidentally omitted the date of the performance inserted the note 'io day' for ' io of June,' as he should have written, and Collier very ingeniously availed himself of this fact to fabricate corroborative evidence as to the meaning of the $n e .^{1}$ The second instance is at $25^{\circ} 3 \mathrm{I}$, which now reads:

$$
y^{\mathrm{e}} 7 \text { of Jenewary } 1597 \quad \text { R at Joronymo . . . . . . . . . iij". }
$$

In the transcript we find a $n e$ before the title, and a close examination of the original will reveal traces not completely erased. ${ }^{2}$ The occurrence of the ne did not suit Collier, who noted (p. 84): " Probably a revival of the popular play called the Spanish Tragedy"; and he therefore removed it. ${ }^{3}$

## § vii. Plan of the Present Edition.

It may be well that I should say a few words concerning the methods adopted in the preparation of the present reprint. ${ }^{4}$ My aim has been to give such
${ }^{1}$ Compare what, in his Introduction, Dr. Warner characterises as "an instance of extreme minuteness in fraudulent manipulation," in MS. v, art. 52 of the Dulwich collection, where Pattent has been altered to Pallent by the erasure of the cross-strokes of the $\%$.
${ }^{2}$ In both cases the original letters are more readily seen in photographs than in the MS. itself.
${ }^{3}$ I should state that an attempt has recently been made by Dr. Theodor Eichhoff (Der Weg zu Shakespeare, Halle, Niemeyer, 1902) to show that all the $n e^{\prime}$ s in Henslowe's receipt accounts were forged by Collier. The existence of Malone's transcript of course demolishes this intrinsically absurd theory, but those who may desire a more detailed discussion of the subject will find it in an article by me in the Library for July 1904. I may remark in this place that in the course of his work Dr. Eichhoff says that in order to conceal the fact of the forgery of the ne's Collier went over with his pen the neighbouring letters or words ("eine sorgfaltige Fälschung der ganzen Umgegend," he calls it). This, as Dr. Warner pointed out, has been the case in some of the other documents which have been tampered with (e. g. MS. I, art. 49 ; p. 30, note 1), but after a careful examination I am confident that in no instance has this expedient been resorted to in the Diary.

+ Strictly speaking it is of course incorrect to talk of a 'reprint' of anything but a printed original. It is, however, so common and so convenient to speak of reprinting a MS. that we must, I think, regard it as a legitimate extension of the use,
portions of the original as are likely to interest students of English dramatic history, in what is commonly known as a type-facsimile, that is, to reproduce them as accurately as is possible, using type to represent MS. The great bulk of the dramatic accounts were entered, as we have already seen, starting from what was originally the back end of the volume, but which is now treated as the front. The accounts so entered, I have, with the exception of two series of pawn accounts, reproduced entire. At the other end of the volume the dramatic entries are interspersed among the earlier non-dramatic accounts, and it was clearly undesirable in this case to reproduce the MS. as it stood. I have therefore extracted all entries relating to Philip Henslowe and his affairs, again with the exception of a series of pawn accounts, and have reprinted them alone, without seeking to reproduce the original page for page as in the other portion. Throughout, however, the MS. has been followed line for line, and where the whole page has been reproduced the relative position of the entries has, so far as was practicable, been preserved. I have even followed the original in printing upside-down, entries made the reverse way of the page to the other entries found in that portion of the volume. I have also endeavoured, and, I think, succeeded, in making the rectos and versos of the reprint correspond in general with those of the original. Where this could be done without sacrifice of compactncss it appeared distinctly desirable that the same pages should face one another in the reprint as in the MS. Where, however, the pages were only partially filled, or had been in part torn away, two pages of the original have sometimes for the sake of economising space been reprinted in one, and for the same reason the order of the pages has in two cases (102-3 and 233-4) been altered. The numbering of the folios will, I think, prevent the possibility of confusion in these cases. This foliation follows the modern pencil numbering of the original; line numbers have been added for convenience of reference, and likewise notes of blanks and mutilations; also page numbers, which, however, will in no case be used for reference.

The reprint being as far as possible of the nature of a facsimile, I have of course preserved not only the erratic spelling and general absence of punctuation of the original, but also such absolute errors as not infrequently occur. I do not think that any serious inconvenience will be found to result from this piece of conservatism, but be that as it may, it does not affect the principle involved. It is no object of mine to make things speciously easy for the student, or to force my own interpretations upon him, but to place at his disposal as exactly and fully as possible the evidence supplied by the MS. and that alone. I conceive that the proper treatment of a document such as the present differs essentially from that of a literary text.

The great aim, therefore, that I have held before my eyes has been accuracy: there is perhaps no aim in the pursuit of which one is so apt to be disappointed. xivi

With the difficulties of deciphering Henslowe's handwriting I have dealt at length already. It only remains for me to express my hope that however numerous may be the points on which a difference of opinion is possible with the MS. before one, the cases in which I can definitely be shown to have been in error may be few or at least unimportant. It may well be a vain hope. One thing only I ask; that when question arises, I may, until proved wrong, be given the benefit of the doubt. There is scarcely an entry probably which will be found to agree exactly in Collier's edition and in minc; but I ask that, though his may appear the more plausible reading, it may not therefore be assumed that mine is incorrect. To have noted all divergencies would have been obviously impossible; even to note all the more important proved impracticable. Not only did they overcrowd my notes to an insufferable extent, but as soon as I undertook to give any variants I laid myself open to misunderstanding in cases of omission. I therefore do not undertake to give any cases of variation whatever, but only note arbitrarily a few, mostly dates, which appear to me of particular interest or importance. In the same way and for the same reasons I do not undertake to note all the cases of evident error in the MS. itself. It is impossible to draw a hard and fast line between unusual though admissible forms, and those absolutely incorrect, or again between these latter and mere slips of the pen. I consequently note only such errors as appear likely to present difficulties to the student in the interpretation of the MS., for the sake of offering my own conjecture as to what the correct reading should be. So too I have collected a number of unusual forms in a glossary, which the reader may find of use, though it in no way pretends to be exhaustive.

It may be well that I should state what means I have taken to ensure accuracy. I started by collating the MS. throughout with Collier's reprint, correcting my copy of the latter as I went along. It soon, however, became evident that it would be impossible to use this to print from, and I was therefore obliged to make a complete transcript in my own hand. From this transcript the text was set up. The proofs were read first with my corrected copy of Collier and then with the MS., and all corrections in the revise were again checked with the original. This was also, of course, constantly referred to on specific points of difficulty, and I can only admire, in the fullest sense of the word, the tolerance and unvarying courtesy with which the officials of the MS. department at the British Museum met my constant demands for assistance. I need hardly add that I shall regard as my most friendly critic the one that can do most towards removing errors from the text.

In reproducing MS. by type a number of conventions are necessary. In the first place we have the occurrence of different hands and of entries crossed off. After careful consideration it was decided not to indicate these in the text but to draw attention to them in the notes. In some cases again an entry is not
itself crossed off, but is cancelled by a more or less elaborate crossing in the margin : these again are mentioned in the notes. Lines drawn in the MS., when of the nature of mere guiding-lines serving to connect one portion of an entry with another, are represented by lines of dots; where, however, they serve to mark divisions as between different entries, or at the beginning of a fresh week in the receipt accounts, they are represented by rules. Wcrds or letters which have been deleted in the original are placed, when still legible, within square brackets [thus]. Sometimes words or letters have been written over others, in which case the original reading is, when legible, printed in italic and placed in square brackets immediately before the word or letters under which it now appears. Words or letters which should apparently have been deleted, but were not, are placed in conical brackets 〈thus〉; those which for any reason cannot now be read are supplied when possible in broken brackets [thus]. Modern pencil notes are ignored in the text ; all modern entries in ink, whether of the nature of forgeries or not, are printed in Clarendon type, and deletions, by the forger, of genuine words or letters are placed in curly brackets \{thus\}. It should be mentioned that in certain portions of the MS. there are frequent small crosses in the margin, apparently intended to call attention to particular entries. Of these the majority appear to be old, while on the other hand some are undoubtedly modern. Since little seemed to be gained by reproducing these, and much difficulty caused by attempting to distinguish between them, it was decided to omit them altogether.

## § viif. Fragments belonging to the Diary.

I have already mentioned that two fragments cut out of the Diary have found their way among the MSS. of the British Museum. One of these was printed by Dr. Warner in his Catalogue (p. 163). It was bought for the Museum at Puttick's at a sale 2-3 June 1878, and now forms part of Addit. MS. 30262. It is impossible to identify the exact place in the MS. to which it belongs (possibly the bottom of folio 30), but little doubt can exist as to its provenance. The other fragment is contained in a volume of miscellaneous MSS. collected by Collier and containing annotations in his hand throughout. It was purchased at the Ellis sale at Sotheby's (I6-28 Nov. 1885) and is now numbered Egerton 2623. Concerning the fragment in question, Collier has noted, ' 1597 Original $\mathrm{Mem}^{\mathrm{m}}$ signed by E. Alleyn, the founder of Dulwich College, on hiring William Kendall for 2 years as an Actor in London and in the Country, at the theatres of Alleyn's father Philyp Hinchlow. The date is $8^{\text {th }}$ December, 1597 ,' to which the further pencil note is appended in a hand I have been unable to identify: 'This document is quoted in Malone's enquiry into the Authenticity of the Ireland Forgeries, pp. 245-6, as from Henslow's Diary. Malone's work is dated 1796.' The verso of the fragment contains some xlviii
of the forestry accounts, which enable us to identify it as the missing portion of folio 231. It was reprinted by Collier in his History of Dramatic Poetry (1831, III. 89) with a not very accurate facsimile of the signature. Immediately after his unfounded statement that Malone printed in his edition of Shakespeare entries from the Diary which had subsequently been cut out, appears the note: "Not very long since I bought at an auction a volume of old plays, in the centre of which, and used as an index to keep a place, I found what I have no doubt once formed part of Henslowe's Diary," and then follows the entry. So far as I am aware, this is the only entry mentioned by Malone as being in the Diary which is not there now, and it was not printed in the Shakespeare. We may accept Collier's statement of how it came into his hands or not as we please. I subjoin reprints. Each entry is in the autograph of the signatory.

NOTES

\section*{NOTES}
[In printing the text the following conventions have been employed:
Words or letters crossed out or erased in the MS. are placed in square brackets, thus: pd toward the [deathe] beringe of ardnold.

Words or letters which have been altered are printed in italic and placed in square brackets before the words or letters under which they now appear, thus: a Boocke called [ \(m\) ]vorti[ \(m\) ]ger ; where \(a \mathrm{v}\) has been writien over the first m and a g over the second.

Words or letters now illegible for whatever cause (blot, tear, burn or wear) are supplied where possible in broken brackets, thus: ther boock \(w^{\text {ch }}\) they [are] a writtenge called pagge of \(\left.p_{L}^{[l e}\right]^{\text {oth }}\).

Words or letters which should have been deleted but have been left standing in error are blaced in conical brackets, thus: a Boocke 〈called \(\rangle\) wherin is skogen \(\mathbb{\&}\) skelton.

All entries in modern ink, whether intended as forgeries or not, are printed in Clarendon type, and words crossed out in modern ink are placed in curly brackets, thus: in earenest of a \{tragedie\} called Robin hoodfellowe some of .

In the notes, H. stands fur Henslowe, C. for Collier.]
Preliminary Note. The recto of the first leaf and verso of the last (1 and 238) as well as the inside of the vellum wrapper are covered with miscellaneous scribble apparently for the most part in H.'s hand. With few exceptions the writing is of the nature of calligraphic experiment only and cannot be supposed to have any particular significance. The following notes will give some idea of what can be disentangled of this medley.
F. 1. The most frequently repeated entry is H.'s own signature 'Phillippe Henslowe.' This occurs in several different styles, the commonest being that used by H. as a signature on 24 and \(89^{\circ}\). The form 'Hensley' also occurs several times both in this style and others. There also occur frequent repetitions of some words found also in the body of the volume (cf. 221). We find these in their fullest form as 'lamentable Somplayneth \& showeth vnto,' elsewhere it appears correctly spelt 'Complayneth.' The following is the only business entry:
layd owt a bowt wh [? William Henslowe]
as ffoloweth
Jtm lent . . . vjd
Jtm lent
Jtm layd owt goinge
to the corte \& wesmestr \(\mathrm{iiij}^{\mathrm{i}} \mathrm{ij}^{\mathrm{d}}\)
Other fragments run: 'yf thow wist what thinge yt ...' 'mersey moste homble '. . . for when J lent J wasse A frend \& when J asked J was a foe [?]' 'A man with owte mercye of mersey shall myse \& he shall haue mersey \(y^{\mathrm{t}}\) mersey full \(\mathrm{ys}^{\text {' }}\) ' \(\mathrm{Jn} \mathrm{Rm}{ }^{\mathrm{r}} \ldots\). \(103-0^{8}-0^{d}\) ' 'lord god saue \(o^{r}\) quene'. Several names likewise appear: 'Chomley when' 'Clement Bowle' 'Bowles willsone' 'Pr me Johne willsone'.
F. 238v. At the true head of the page is the name 'Palle yonge' and the receipt:

> ' for the agew

Take brianey Roote \& steape yt in alle all a nyght then drincke yt lucke warme a fore the fyte come \& [it will do ?] good vpon yt'
Below this is a rough attempt at a horoscope which has not however been carried very far. The rest of the scribble has been made with the volume reversed. 'By me John henslow' 'p me Johne williamsone' 'This is John henslow Boke 1577' 'John hod the fyrst Lefe ' In the name' 'willsones Bowghte' 'for when J lent J wasse A frend' 'The Boke of Reconyge ffor this yeare 1576 \& 1577 ' 'doinnge youe to vnderstand \(y^{t} J\) haue Receued ' 'p me John willsone' ' \(\mathrm{m}^{r} \mathrm{~s} \mathrm{d}\).m went to [hey] totname heycrosse the 19 of June 1593 on a wendesday', 'pdenamy' ' \(\mathrm{m}^{\mathrm{r}} \mathrm{D}\). [or C ?] \(\mathrm{m}^{\mathrm{r}}\) wente to grenstead the 14 of July 1593 ' 'The condicions' ' \(w^{m}\) came to towne the 28 of July 1593 \& went a waye the 6 of aguste \({ }^{1} 593\) ' 'god saue \(o^{r}\) quene'. It is evident that not all this scribble is in P. H.'s hand, but as most of it is written not in the ordinary style but as a calligraphic exercise it is practically impossible to be certain in each individual case. The entries relating to the ownership of the book and to the date of the accounts are certainly not by H., while the other entries of any length are. The rest are doubtful but unimportant.

Cover. Besides H.'s name we find those of 'Thomas homble' and 'Jhon Whitte', also the words 'Lamentable Complayneth \& showeth vnto your lordships[?]'. The rest is either too fragmentary or too indistinct to make anything of.
F. 1v. 2. the. (C. ther.) H. probably intended to enter the date as in 1.5 etc., and then wrote for mydsomer qt instead.
20. Jo. (C. Ja.) There is a stroke after, or rather partly under, the 0 , which does not, however, appear to mean anything.
F. 2. 2. \(q^{*}\). This should almost certainly be \(o z\) as in 1. 4. The sign consists of an \(o\) with a curl round it. In this instance the pen has not marked properly, and part of the curl has been gone over again. C. printed 17 oz \(\frac{1}{2}\) at \(v^{s} . y^{d^{d}} q\)., but I feel convinced that \(H\). intended ' \(17 \frac{1}{2} @ 5^{9} 6^{d}\) the oz' in spite of his having ' 8 oz \(\frac{1}{4}\) @ \(6^{8} 8^{\text {d }}\) ' in 1. 4. Neither sum, however, works out right.
5. This entry is written in red ink with the exception of the 22 and of the first \(i\) of \(i i i j\). For the former a space appears to have been left, and the figures were subsequently inserted in the brown ink of the surrounding entries, the \(i\) being added at the same time.
10. lise. (C. lifte.) H. of course means lies, i.e. dwells. The insertion of a \(t\) after an \(s\) is a common mistake with C ., who took the downstroke of the head of the long \(s\) for a separate letter, especially before \(e\) and \(c_{\text {a }}\)
11. Between Keayes and \(a\) is a caret-mark, but nothing is inserted.
13. AEDH. Presumably the initials of witnesses.
F. 2v. \({ }^{\text {v }}\) This item is interlined.
27. The sum should be \(£ 8\) igs. od., but the short dash before the 08 was finished off with a cross stroke making it look somewhat like ro8. H., while making the next entry, appears to have imagined that it really stood for 108, and thinking it not sufficiently clear, made the cross stroke into an undoubted \(I\) with a dot, in the blacker ink he then happened to be using.
30. 3 of maye. I was wrong in following C.'s reading here. Though badly formed the figure is undoubtedly an 8.
F. 3. \(11, x-3,4-7\) and \(8-11\) are crossed off. Alleyn's signature in 1.12 is in H.'s hand, as is frequently the case.
F. 3. 11. 3-4 and 24-32 are crossed off.
2. Evs. (as.)
5. 1595. (C. 1596.)
9. burte. (C. Burle.) C. notes, "The name is either Burle or Burle, perhaps the latter; but it is indistinctly written in the MS." To maintain that the MS. was illegible was a favourite device of C.'s, when he wanted to suggest an impossible reading. The MS. is in this instance perfectly clear and the reading undoubtedly burle. The name is further placed beyond question by its occurrence in Frances Henslowe's pawn accounts under dates 7 March 1593 and 26 Aprill 1594 ( \(\mathbf{7 6}^{v}\) and \(77^{\vee}\) ).
22. John. This should apparently be Joan; unless we take her in 1.25 in the sense of their, which is possible (cf. \(65^{\mathrm{v}} 20\) ).
29. p. (pd.)
F. 4. 14. hafe. (half ?)
43. Except for the tail of the \(s\) the sum has been completely worn away at the corner of the leaf.
F. \(4^{\mathrm{v}}\). The \(C\) 's standing for 100 are of a distinct form from those usual with H .
14. C. This is far from distinct, having apparently been altered, but it can hardly be anything else.
15. \(S\). (C. s.) Though blotted, there is no doubt it is an \(S\), and C.'s explanation of it as standing for single is presumably correct.
\(23^{-25}\), side-note. The whole of this note is indistinct and difficult to read. C. read the second word as had, and on consideration I think I was wrong to change it. C. further read the sum as \(i i i j^{s} i j^{d}\), which is undoubtedly wrong. The figures are quite clear, but there is something after them. This at first appeared to me to be merely a stroke (/) as shown in the text, but a furthe examination has convinced me that it should be of, the \(o\) being partly concealed under the second ", and the top of the \(f\) being blotted. Lastly, I was wrong in following C. in his reading Joane. It should clearly be Jorne, i.e. iron. The meaning therefore presumably is so many pounds of iron. H. on other occasions uses \(l l\) for \(l b s\).
34. The \(q\) in the interlining should be \(q\).
37. 〈for〉 bordes. (C. fort bordes.) Read fore bordes. I at first took the strokes after the \(r\) (C.'s \(t\) ) to be without significance, and the for to be an accidental repetition. On further consideration, however, I think we should read fore for fir as at 428.
40. fryingpan. C. prints fryingpad, adding a note "Sic in MS."; but he is wrong.
F. 5. 19. C. misplaced the sum to this item opposite 1. 18.
22. ob. This is doubtful, being roughly written on the edge of the leaf which is partly worn away.
29. Jtm of. (C. Itmi bourght of.) Although the lower part of the letters is torn away, there can be no doubt as to the reading. \({ }_{9}^{1}\) C. (C. 3 C.)
30. There was no sum to this entry. The last word appears to be lockes. The upper part of the previous word is also visible, but I have been unable to decipher it,
F. \(5^{\mathrm{v}}\). \(11.1-5\) are in the hand apparently of James Borne, with the possible exception of the alteration in 1.4 , which has been made in a different ink and may be in H.'s hand.
13, 14. 28. (C. 23.) cf. 2v 30.
F. 6. 7. 1595. (C. 1593.) C.'s supposition (p. 17, n. 1.) that H. spent money on Davis' house on two occasions is due to his own misreading.
39. helme. (C. ealme.) There can be no doubt as to the he and the me. The middle letter might be either \(l\) or \(b\), and is followed by a small blot which might conceal a narrow letter. H. most probably meant 'elm,' though it would not be impossible to read hebenne for 'ebony.'
F. \(\mathbf{6}^{\mathrm{v}}\). 32 \(^{2}\) C. omitted a line here.
36. gystes, i.e. joists. (C. gyrtes, i. e. girths? or girders?)
42. J. \(\bar{h} a\). These letters are clearly visible under the sum, but are in a different ink. They are probably contemporary with and refer to the interlineation opposite ( 745 ), the ink being apparently identical.
F. 7. 31. There can be no doubt of the letter before Jerusallem, and I suppose H. started to enter some other title, though what I cannot say.
F. \(7^{\mathrm{v}}\). Io. \(l_{2} y^{s}\). There appears to be an \(x\) under the \(l\), but I cannot be sure.

26-7. The dates here are irregular.
32. harey the 6 the 14 of maye. (C. harey the vth, the 14 of maye.) Malone was right.
42. I cannot be certain whether the date was first written 15 or 16. It must apparently have been one or the other, and yet neither will account for the traces visible. It may have been altered twice.
F. 8. 6. I day. After the I there is a faint trace of a figure which has apparently been erased. Malone's transcript has ro day.
21 . the 31 of. (C. the 3 of.)
28. 1593. (C. 1592.)
34. harey the 6 the 16 of Jenewary. I unfortunately failed to notice that this is miswritten the 6 of 16 of in the MS.
41. 24. (C. 25.)
42. 25. (C. 29.) The second figure is somewhat uncertain, but I think it is 5 . In appearance it most resembles a 9 , but is formed as a 5 . Whichever it is H., I think, began to write a 7 and then altered it, which would account for the unusual form.
43. \(i i^{\prime \prime}\) xiiijs. (C. \(i i^{s}{ }^{s} i i i j^{s}\).) The sum is a little difficult to decipher owing to the corner of the leaf being worn.
44. The sum to this item must be regarded as somewhat uncertain; it has been almost entirely worn away.
F. \(8^{\mathrm{v}} .21\). \(i x^{s}\). (C. \(x^{s}\).) The sum is blotted, but I do not think that any alteration has been made.
F. 9. 6. \(y^{e}\). (C. the.) The sign is the same as that used in 1. 19, etc.
F. \(9^{\mathrm{v}} .26\). eamden. C.'s reading is undoubtedly correct, but he is wrong in saying that Malone read candero. Malone has camdew, a mistake which would be very liable to occur.
31. There is some confusion among the entries at this point, and again at l. 35 where two dates are repeated.
F. 10 \({ }^{\mathrm{v}}\). 13. novemb3. The word as corrected should be novẽ̉; ; \(n\) is prefixed, \(o\) stands \(e\) is altered to \(v\) and to to \(\bar{e}, b_{3}\) stands.
F. 11. 4. \(S\) steven. (C. Cstmes.)
F. 11. l. 46 is a modern forgery.
15. seleo. (C. steleo.) Malone gave the name correctly. ef. 2 ro.
46. 18. The 8 is very indistinct, the corner of the leaf being much rubbed. I should be unable myself to say whether the figure was \(\mathcal{8}\) or 9 , but Dr. Warner, who examined the MS. more than twenty years ago and was the first to detect the forgery, is confident that it is 8 .
F. 12. 11. \(1-15\) are crossed off. The entry and the first signature are in the hand of John Griggs, the rest is scribble by H., who appears to have amused himself with imitating Griggs' signature. 'The seal has been cut out leaving a hole \(\frac{5}{8}\) in. high and \(I_{8}^{3} \mathrm{in}\). broad, now mended. The three outer edges have been cut with a knife, the inner torn. There is still a drop of soft yellow wax adhering to the paper on the right of the hole. The word dyer in 1.4 has been underlined, and a cross added in the margin apparently in modern ink.
F. 12v. 28-30. At this point occurs the hole due to the cutting out of the seal on the recto. The ' Z ' has suffered in each case, being at the frayed inner margin, and that in l. 29 has almost entirely disappeared. On the other hand, it is noticeable that no year has ever been entered against these three items. This suggests that the hole may have already been there at the time when the entries were made, in which case the inner margin must have got torn or frayed later. The date of the seal is July 1592, that of the entries June 1595. A close inspection will show that the hole must have been cut between these dates. The tail of the \(e\), namely, at the end of June in 1. 28, has been carried over the edge of the cut, and a small ink mark will be found at the corresponding point on \(11^{v}\). So too the top of the second \(d\) of mydsomerdaye in l. 31 has left a mark on the previous leaf. In like manner it can be shown that H.'s scribble on the recto of the leaf is not only subsequent to the cutting out of the seal, but also to the entries on the verso, for the top loop of the \(/\) in I. 19, which does not appear on that page, is found at the corresponding point on 13 , having been drawn past the frayed inner edge of the hole.
48. \(x x x^{5} i j\). The \(i j\) was probably an addition and the sum intended not \(x x x^{s} i j^{3}\) but \(x \times x i j^{\prime}\).
F. 13. 15. 30. The 3 has been altered from a 2 .
19. 6. (C. 5.) It is possible that H. tried to alter the 6 to 5.
F. 13v. 11. \(1-7\) are in Alleyn's hand except for the mark. 11. 8-II are crossed off.
F. 14. 22. The line has been drawn opposite this entry by mistake for the next, and subsequently erased.
29. \(S\) steuens day. (C. Cstmes.)
F. 15. 11. \(1-4\) and 5-16 are crossed off.
F. \(\mathbf{1 5}^{\mathrm{r}}\). 6. The entries are again somewhat irregular at this point.

\section*{F. 16. \\ 1l. 18-26 crossed off. \\ 26. 3. Probably an error for 13.}
F. 16 \({ }^{\mathrm{v}}\). There are many difficulties in this and the following pages, but I leave them to the hermetic student to solve, contenting myself with as accurate a transcript as possible of the original. The large letters at the head of the page stand, of course,
for the signs of the zodiak, and the directions that follow are evidently for the casting of a nativity. They appear, however, to be incomplete. The page is not in C .
13. A letter or letters after the illegible.
F. 17. \(\quad 11.11-33\) are in a different hand, which does not appear elsewhere in the volume, and which I cannot identify. Not in C., but 11. 6-10 and 30-33 are given as specimens.
22. \&o . . . \&o. This is the most likely meaning for the signs in the MS., but they may very well have no meaning at all.
F. 17. Not in C.
2. stythe. So the word appears to stand in the MS., but it is badly written and may be styche.
28. anorter, for a mortar (?).
34. then, for ther, i.e. their.
F. 18. Not in C., but ll. 1-5 are given as a specimen.
7. asibanū. The first two letters of this word are very doubtful.
8. frencomsence. (frankincense.)
16. そ \(f\). Probably \(弓[? o] f\).
F. 18. 11. 18-23 are crossed off.
5. this. (thus.)
17. a proved. (proved.)
F. 19. The lower entry has been made with the volume reversed. 11. 22-26 are in Chaloner's hand. W. Henslowe's signature, 1. 2 I , is autograph. 11. 22-23 and 24-26 are crossed off. 11. 1-20 are not in C.
F. 19v. The entry at the foot of the page has been made with the volume reversed. 11. \(13-16\) are a modern forgery. 11. \(1-4\) and 6-12 are crossed off. 11. 17-26 are not in C .
3. In the date H. appears to have first written 7 and then changed it to 3. It is, however, possible that he originally intended 3, but made it (as he frequently did) almost indistinguishable from 7 , and consequently went over it again with the pen to make it more distinct.
5. The \(p d\) was added by H. in a different ink later.
13. The sums to this and the preceding entries are omitted in C. The form desembr alone would make the entry suspicious. C. has Fostus for ffostus, Tamberlen for tambelan, and omits more. These inaccuracies may have been intentional.
26. The day of the month has been omitted in the heading, a space being left blank. In the entry items \(1,2,4\) and 5 (11. 24-23, 22, 20, and 19-18) have been cancelled in the margin, and the sums of 4 and 5 crossed out.
F. 20. 11. I-8 are in Stonard's hand.
9. This account is repeated from 21.
F. 20 \({ }^{\text { }}\). Downton's name in 1.6 is a modern insertion. It is copied from 1. 9. ll. \(9-15\) are crossed off.
4. The mark consists of the initials followed by a curl which I take for \(v\).
10. A space has been left blank for the name.

\footnotetext{
F. 21. \(11.1-7\) and 8-17 are crossed off. Page not in C.

A couple of additions are scribbled in the outer margin near the top. They bear no relation to the other entries.
}
F. \(21^{v}\). 3. \(i j^{j}\). C.'s conjecture that this should be \(i i^{\prime \prime}\) is probably right.

22-3. The dates in these lines are irregular. C, has 23 and 24.
34-7. These entries with irregular dates are omitted in C.
42. 14. (C. 13.) Probably the 12 in I .41 is a mistake for 13.
F. 22. II. \(1-4\) and \(20-23\) are in Malthouse's hand. II. 5-11 are a rough draft of the next entry and are scribbled in a very careless hand. II. 12-19 are in a small and neat English hand which, though very different in appearance, I am inclined to identify with that of \(11.5-11\), the resemblance being more apparent in l. 19. Il. 1-4, 5-11, 12-18, 20-23 and 24-29 are crossed off.
19. The mark which I have rendered by \(h\) we is a mere scrawl. It is only the analogy of other marks which suggests that this and some others like it may possibly stand for initials. Probably the mark would be better rendered by \(h w\) alone.
24. marter. (C. marten.) This is perhaps not a mere slip, but a vulgar phonetic attraction to the form of the surname.
F. 22v. 11. 1-3, 4-7, 9-12 and 15-33 are crossed off.
29. In the sum a \(v\) has been written over the \(i i i j\); the result being far from clear it has been struck out and \(v^{\mu}\) substituted.
F. 23. Il. 5-10 and 16-36 are crossed off.
23. In the sum the first \(x\) has been inserted later.
27. holanday. This is the better form (from gen. pl. halgena), but it would also be possible to read holauday for 'hallowday.'
F. 23v. 11. 1-14 and 22-27 are in Johnson's hand ; 15-2I in Hatto's.
12. There is a blot at the beginning of the line, but whether anything has been obliterated it is impossible to say.
F. 24. 11. 16-17 are crossed off.
13. neth. (next.)
F. 24 \({ }^{\mathrm{r}}\). 11. 3-4 are in Massey's hand. 11. 1-2 are crossed off.
7. pd to thomas. Added later in a different ink.
8. [s ]. A letter following the \(s\) (or possibly \(f\) ) is indistinguishable. I suppose that H . started to write sonday.
F. 25. 11. I-9 are in a hand which does not appear elsewhere in the volume. It is not that of any of the persons mentioned.
15. foster. (C. fostes.) Again I think a case of attraction (cf. 22 24).
F. 25. 9. 8. (C. 5.) Though badly made there can be no question what the figure is.
23. In the date H . has corrected \(o\) to 9 , but forgotten to change 3 to 2 .
26. 1596. (C. 1597.)

3r. In this entry the ne has been carefully erased with a knife. It is in Malone's transcript.
F.26. The sums to these entries are a great puzzle. It should be remarked here that the earlier items do not appear to have been entered day by day but in blocks. The first eighteen lines are written in three different inks, and were entered at three different times. (i) First the entries of Jan. 24 and 25 were made but only the first two columns of figures filled in. These are in brown ink. (ii) Next the entries from Jan. 26 to Feb. 5 were made, but in each case with only the first two columns and the first figure of the third filled in. At the same time a \(O\) was added to the entries of Jan. 24 and 25. These are in darker ink. (iii) Lastly the entries of Feb. 7 to 12 were made and at the same
time the last five figures added to the previous entries. These are again in brown ink, but darker than (i). The figures are not always very clear, but the only cases where any real difficulty arises are certain badly formed o's which look like \(I\) 's and the frequent confusion of 3 and 7. These require careful attention before the reading can be decided with certainty. The figures in C. are very inaccurate, particularly in the above-mentioned cases. It will be noticed that after Jan. 25, the habitual ' \(R\) ' is replaced by a different sign. The new symbol might be taken merely for a different form of the same crossed \(R\), but a comparison with other passages shows that it is in fact \(t\). H. not uncommonly doubles the initial letter of a word to indicate a majuscule, not only in the case of \(f\) as was habitual at the time, but also of \(s\) and \(t\). Thus at 2328 and elsewhere we find the word ttottalles, beginning with identically the same sign as that used here. It would therefore seem that in the present entries the sign should be taken to indicate 'total receipts.' Whether H. made a conscious distinction between the use of ' \(R\) ' and \(t t\) it is difficult to say, but it is at least significant that we find the use of the latter sign practically coinciding with the more elaborate and puzzling form of double entries.
F. 26 \({ }^{v}\). 6. Entry omitted in C.
40. moste. The word is written rather slantingly up the margin. It does not appear to refer to anything in the accounts.
F. 27. 20. hardwute. (C. Hardacute.) The word is smudged and rather illegible. It might possibly be hardconte, but I do not think it is.
27. 26. (C. 2.)
F. 28. 9. This entry is cancelled in the margin.
F. 28. Herne's signature in 1. 10 is autograph. 11.1 -5 and 12-14 are crossed off.
F. 29. \(11.1-5\) are in Haughton's hand, with the exception of the initials \(J . D\). in 1. 5, which are in Day's. 11.6 and 7 are in Chettle's hand, except the stete added by H. II. 8-13 are in Day's hand, except for Haughton's autograph signature in 1. ir. 11. 1-13, 18-19, and 20-22 are crossed off.
12. same. The word is represented by the first and last letters with a stroke between them.
F. 29v. 11. \(\mathbf{1}-3\) are in Chettle's hand. 11. 4-6 are a modern forgery.
1. [Gri]. Chettle apparently began to write Grissell. (See 31 г6.)
F. 30. \(\quad 11.5^{-1 I}\) are in Porter's hand.
F. 30 \(\quad\) 11. \(1-4\) are in Downton's hand, 11. 8-12 in Haughton's.
11. \(1-3\) and 5-6 are crossed off.
F. 31. 11. i-6 are in Drayton's hand, 11. 8-1 1 in Haughton's, \(11.12-14\) in Day's, and 11 . 16-21 in Chettle's. In 1. 15 Day's signature appears to be autograph, though it differs considerably from that on 29 ; \(p d\) © quite is added by H. Haughton's and Dekker's signatures in 11. 22-23 are autograph. 11. 7-14 are crossed off.
6. Mih. (C. Mic.) Like the rest of the entry the signature is an almost illegible scrawl.
F. 31 \({ }^{\text {v }} \quad 11.1^{-23}\) are in Hathway's hand, except Rankin's autograph signature in 1.23. 6. grate. (groat.) There appears to be either an \(a\) or an \(o\) under the \(r\).
19. This entry is in very watery ink which has hardly marked at all. In 1.21 the forty has been inked over at the time to make it more legible.
F. \(32,32^{r}\) are not in C.
F. \(32^{v}\). 9. 4. The figure appears to have been altered from something else.
F. 33. II. 5-9 are a modern forgery.
F. 33v. II. 22-25 are a modern forgery. At the end of 1.13 , partly covering the 1 of lent, is a small blot of modern ink. 11. 10-14 and 18-20 are crossed off.
F. 34. 11. 17-20 and 21-22 (except margin) are crossed off.
5. aprell. An error for May.
13. 31 of June. Presumably July 1.
F. 34. \(\quad 11.1-6\) and \(9^{-18}\) are crossed off.
F. 35. 11. 3-17 and 18-19 are crossed off.
2. \(f o \bar{r}\) (frō).
8. aprell. An error for May.
16. 31 of June. Presumably July 1.
F. 36. 11. \(1-3\) are in Shaa's hand. 11. \(1-3\) and \(8-14\) are crossed off.
F. 36 \({ }^{\mathrm{r}}\). 11. 26-27 are crossed off.
F. 37. 11. \(1-16\) and \(17-34\) are crossed off.
30. nozenb3. I have retained this as a possible spelling on the analogy of penbrocke for Pembroke ( \(36^{\mathrm{v}} 3\) 3).
F. 37. \({ }^{\text {r }}\) 11. 4-28 are crossed off.
11. yeare. C. suggests 'hair,' but the word recurs \(43^{2}{ }_{23}\).
pyges. (C. Pages.) "Malone, not being acquainted with [the ballads on the subject of Page's murder], calls the tragedy 'Peg of Plymouth', and sometimes Pyg."-C. Malone certainly read the MS. correctly in this instance.
23. gyges. I imagine that this most likely stands for gages (the form gayges is found). Collier explained it as jigs (cf. \(43^{\mathrm{v}} 30\) ).
F. 38. II. 1-6 are in Maulthouse's hand. Alleyn's signature in 1.7 is autograph. 11. 1-6 and 19-32 are crossed off.
29. fecthed \(y t\). (fetched it.) (C. fetched \(y^{\prime}\), i. e. that.)
F. \(3^{8}\).
11. \(1-6\) are in Carter's hand. 11. 20-32 are crossed off.
F. 39. Il. \(18-35\) are crossed off. 11. 1-17 are not in C.
14. a tachen. It should be a tached: a superfluous minim after the \(e\) makes it look like \(a\) tachen at first sight.
22. wittines. Here there are only two minims between the \(t\) and the \(e\), though the first one is distinctly dotted. But see 1. 26 .
35. \(y\). The sign as on 919 , etc.
F. 39\%. 11. 16-19 are in Birde's hand.
11. 16-19 and 20-24 are crossed off. 11. 1-7 are not in C.
F. 40. The left-hand signature in II. \(3^{2-33}\) is autograph, that on the right probably a copy by H. There is a scrawl between the two. 11. I-22 are not in C.
F. \(40^{\circ}\). II. 11-13 are in Downton's hand. II. 11-12, 14-15, and 16-17 are crossed off. 1. 24. (C. 29.) Though in appearance somewhat like 9 the second figure is, I think, undoubtedly a 4.
F. 41. Not in C.
18. a sente talbanes. (at Saint Albans.)
F. 41 \({ }^{\text {v }}\) 11. \(25-38\) are crossed off. 11. 1-29 are not in C.

2 I . boote. I imagine a boat is meant.
23. There does not appear to be anything under the blot which comes from the crossing off of the opposite page.
F. 42. \(\quad 11 . \mathrm{I}^{-5}\) as far as phillippe are in H.'s hand ; from 1. 5 his to 1.101598 in Downton's ; \(J\) say \(z j^{j /}\) is added in a different ink by H. and the signatures in ll. 11-13 are autograph. (That in 1.22 is a copy by H.) ll. \(1-10\) are crossed off.
7. There is a caret mark between of and \(\mathcal{S}^{\circ}\).
9. or (our.)

2 I. The words ageanste ... daye and the signature in 1.21 are added in a different ink.
F. 42 \({ }^{\text {r }}\). Alleyn's signature in l. 5 is autograph. 11. 12-2 1 are not in C.
F. 43. 1l. 16-21 and 23-24 are crossed off. 11. 11-24 are not in C.
2. laynge. (C. playinge.)
F. 43 \({ }^{\text {v }} \quad\) 11. \(36-37\) are crossed off.
31. \(\langle\boldsymbol{I}\rangle_{I 2}\). The first figure was written in the tail of the \(f\) of for in the line above, and not being distinct was repeated.
27. copr. This is miswritten cop \({ }^{r}\) in the MS.
F. 44 . \(\quad 11.6-7\) and \(8-9\) are crossed off.
5. 5. (C. 3.) H. may have intended to write a 3.
F. \(44^{\mathrm{v}}\). The autograph signatures in 11. 22-28 are all crossed off.
F. 45. 14. [ab]. Probably for about, but we should possibly read as. pryuat. The reading is a little doubtful.
18. The title has been filled in subsequently in a space left for the purpose. This proved insufficient, so that the word sones is partly written over fower.
31. \(\langle g e\rangle\). Possibly for gerkins. The letters are blotted, and some attempt may have been made to cross them out.
F. 45 \({ }^{\mathrm{v}}\). 11. \(\mathrm{II}_{1-1} 3\) are crossed off.
F. 46. \(11 . \mathbf{I}-5\) are in Downton's hand with Hathway's autograph signature.
F. \(46{ }^{\mathrm{v}}\). 2. 1595. (C. 1598.)
3. iylle. (C. Wylle.) Before the \(y\) is a small blot with a dot above it. This almost certainly conceals an \(i\), at any rate it is too narrow to cover the smallest \(w\). Whether it was accidental or intended to delete the \(i\) it is impossible to say. H. may have intended either isle, ill or jill.
F. 47\% . 8-9. The words in the margin are written in modern ink and in a modern hand. C. notes, "in another hand, in the margin, we read 'Tassoes [sic] Picture." He appears not to have noticed that it was modern.
F. \(48^{v}\). 19. \(17^{d}\). (C. \(7^{d}\).)
F. 49.
11. 9-14 are crossed off.
F. \(49^{v}\). 14-15. The second title was filled in subsequently in a space left for the purpose which proved insufficient, so that the last word hurte had to be interlined. This title was then struck out and the shared the same fate by mistake.
F. 50. 5. aguste. An error for September.
9. [aguste]. The word has been struck out, but nothing has been substituted. It should be September.

10, 13. Brute. The title has been filled in, but in neither case does it fill the space left.
F. 50'. 19. Lay[d]re. H. first wrote Layd (for Layd out), then tried to change it to Lente. He altered the \(d\) to te but omitted to change the ay into en.
23. 1597. An error for 1598.
F. 51. I5. The title has been filled in, and, although it has been begun to the left of the alignment, has run over the.
F. 51. 1l. 5-10 margin, 23-26 and 27-30 are crossed off.
20. Opposite this entry there is a pencil note in the margin ' \(17 \mathcal{L}\) laid out for this play.'
29. valtinge, i. e. vauting or vaulting.
F. 52. 18. [se]. Probably for sewt.
F. 52 \({ }^{\mathrm{V}} .25\). \([s]\). Either an \(s\) struck out or an \(f\) not struck out. Possibly for send.
29. longberd. The \(b\) is open to question. It is blotted and a long narrow smudge descends from it. This gives it the appearance of an \(f\) or possibly an s (i.e. Longford, or Longsword, as Malone reads). I believe it to be a b, however, in spite of the fact that Drayton himself calls the play longstoord in his receipt for the present advance ( \(\mathrm{Sl}_{3}\) ).
F. 53. The sum in the margin is difficult to decipher, the units of the shillings being alone, however, really doubtful. From the addition it should be 2, and this is quite a possible reading, though \(o\) or 8 would be equally so.
II. There is a pencil note 'strife | see before suil.'
F. 53v. 2. The space left for the title was only from called to the end of the line, so that most of it had to go into the margin.
4. Redly. (Rowley.)
22. The 39 of the sum is written over something else, possibly 58. The shillings according to the addition should be 05 not 00 .
F. 54. 21. There is something blotted or possibly crossed out before the sum.
F. 54. 17. The third figure of the pounds is illegible and has been supplied from the addition. The total should, however, be \(£ 322 \mathrm{~s}\). H. appears to have disregarded the odd shillings in these rough additions.
F. 55-59 are occupied by pawn accounts from Jan. 16, 1593 , to Dec. 18 the same year. Of these accounts the two entries at the top of 61 will serve as a specimen. A few entries of Dec. 19 occur at the top of 60 . The last of these is unfinished, and immediately below occurs the following in H.'s hand: 'Dowing you | to vnderstand my | By me John willsone Borne Baylle | Lord god saue \(\mathbf{o}^{r}\) quene amen'. Immediately below this a large and irregularly-shaped piece has been cut out of the leaf. The rest of the recto and what remains of the verso is blank.
F. 61. \(\quad 11,1-4,5^{-8}\) and \(14^{-17}\) are crossed off. 1. 13 is a modern forgery.
F. 61v. 1.1 is doubtful. It is carelessly written with a bad pen, possibly in H.'s hand, though I am inclined to think not. 11. 2-6 are in Bristow's hand.
11. 17-18 must again be condemned as a forgery.
7. zalter. Both here and in 1. 14 the \(l\) is crossed along with the \(t\), and H. may have intended vatter for vauter (cf. \(51^{\text {r }} 29\) ).
F. 62. 11. \(1-5\) are in Chettle's hand, 11. 7-9 in Porter's. Shaa's signature, 1. 6, is autograph.
5. ssnt. (set.)
18. growue, i. e. grove. (C. grown, i. e. ground.) The word is indistinct, but growue appears the most likely reading.
F. \(62^{\mathrm{T}} .4^{\circ}\). The pounds in the sum are quite illegible.
\(x j^{3} . x j\) was written first, then a second \(j\) added.
41. The 7 is blotted and has, I think, been altered from some other figure. I have restored it from the addition. There is an accidental mark above the preceding \(o\) which makes it look at first sight like a 6.
F. 63. The whole page is crossed off. On the left opposite the top line is the figure ' 39 '.
F. 63v. The page is crossed off and also 11. 13-16 independently.
25. The space left for the title proved insufficient, necessitating part of the last word being written in above. The line is a good deal blotted.
F. 64. The page is crossed off.
F. 64 \({ }^{\text { }}\). 11. 14-16 are in Downton's hand. The insertion in 1.7 is a modern forgery.
The whole page is crossed off, also the marginal entries in 1l. 17-22 and 24-25 independently.
6. A space was left for the name of the author as for that of the play, the former alone being filled in.
23. Below this entry is the pencil note 'began Octob. Ir. 1597.'
F. 65. 11. \(1-5\) are in Shaa's hand, 11. 6-12 in Downton's, 11. 13-16 and 22-24 in Rowley's, with side-note in ll. 23-24 by H., ll. 25-31 in Wilson's. The page is crossed off.
F. 65 \(\quad 11.5^{-9}\) and 14-18 are in Downton's hand, with interlining in 1. 18 by H. John Shaa's signature in 1.25 is autograph. 11. 1 -18 are crossed off 20. her, i. e. their. (C. his.)

20-21. Space left for title filled in at end of 1.20 .
F. 66. 11. 1-4 are in Shaa's hand, 11. 5-8 and 25-28 in Downton's. The page is crossed off.
F. 66\% 11. 16-19 and 25-28 are in Shaa's hand, 11. 20-24 in Downton's.

The page is crossed off.
F. 67. 11. 3-6 and 21-24 are in Shaa's hand. The page is crossed off.
3. \(i x^{t h}\). (C. \(19^{t h}\).)
30. candelithe. (candlelight.)
F. 67. 1l. 3-5 are in Shaa's hand, 11. 10-12 and 24-27 in Birde's.

Rowley's signature in \(1.3^{2}\) is autograph. The page is crossed off.
2. when. An attempt appears to have been made to alter this to for
7. apoyntment. The final \(t\) is almost invisible owing to the pen not having marked.
F. 68. Il. \(24-34\) are in Shaa's hand. Haughton's signature in 1. 16 is neither autograph nor written by H. ; it may be in Shaa's hand. Shaa's signature in 1.20 is autograph. The page is crossed off.
F. 68. 11. 6-12 and 31-36 are in Shaa's hand, 11. 19-23 in Haughton's. Chettle's signature in 1.28 is autograph. The page is crossed off.
10. [i] \(x^{h l}\). We elsewhere find \(/ /\) for lls. H. first wrote \(i x\) and then crossed out the \(i\). There is a blot after the \(x\) which may possibly be an attempt to add a \(i\). The last \(x\) of the sum is a later addition.
24. The date may have been altered more than once.
F. 69. \(11.1-2\) and \(25-32\) are in Shaa's hand; 11. 16-17 possibly in Ilay's. Chettle's signature in l. 3 is autograph. The page is crossed off.
8. maye. (C. marche.)
F. 69 \({ }^{\circ}\). II. \(8-11\) and \(28-35\) are in Shaa's hand. Haughton's signature in 1. 3 is autograph. The page is crossed off.
2. Judas. (C. Indes.) It is either Judas or Jndas, and reappears in the same form at 9529 and \(95^{5} 9\). There was a play distinct from the present one on the West Indies which H. always spells enges, except in one solitary case (1042) where he has Jndies. We may therefore safely conclude that Judas is here meant.
22. After this a line has been left blank for the title.
36. It is impossible to say whether the blot conceals anything or not.
F. 70. II. I-4 are in Shaa's hand, and all the signatures are autograph. The page is crossed off.
F. 70 \({ }^{\mathrm{v}}\). The page is crossed off.
4. sezvatr. (sea-water.)
10. aguste. An error for September.
14. fortezin. (fortune?) (C. forteion.) It would also be possible to read forteron; forteion is less likely.
F. 71. The page is crossed off.
18. harighton. H., having changed his mind as to the spelling when half through the word, probably intended the \(r v\) together to stand for a \(\%\).
22. 1600. Apparently written over something now indecipherable.
F. 71 \({ }^{\text {v }}\). 1l. \(3^{-9}\) and \(10-13\) are crossed off.
13. In the marginal sum the 39 has been written over some other figures, possibly 30 .
F. 72. W. Henslowe's signature in 1.28 is autograph, and so is that of Alleyn in the next line.
2. therepened. (threatened.)

8-9. poote . . . hath. Omitted in C.
23. nexte. The word is indistinct, the \(t\) being almost completely hidden by the tail of the \(f\) of therfor in the line above.
F. 72\%. Bowes' signature in 1.8 is autograph.
F. 73-81 are occupied by pawn accounts dating from Dec. 10, 1593, to Jan. 22, 1594-5.
F. 81v. 11. x-7 are in Wilson's hand, 11. 8-1 7 in Veale's, and \(11.18-27\) in Playstowe's. II. \(1-7\) are crossed off.
23. \(\left\langle i x^{\prime / h}\right\rangle\). The date has apparently been repeated owing to the pen not having marked properly the first time.
F. 82v. 1l. \(3^{-13}\) are in Playstowe's hand, ll. 14-18 in Haughton's except Day's signature in 1. 18, which is autograph.
F. \(82^{v}\). 2. \(w^{m}\) hie. H. undoubtedly intended to write \(w^{h} h e\). The minim between the \(h\) and the \(e\) is, I think on consideration, unintentional.
3. boyes. (C. boye.) H. not unfrequently has a double possessive.
F. 83. 2. 28. (C. \(\boldsymbol{x 8}\).)
F. 83 \({ }^{\text {v }}\). 11. r-7 are in Playstowe's hand, ll. 8-11 in Hassard's, 12-19 in Duke's except side-note by H .
14. hinchlaw. The latter part of the name is badly written with a pen that did not mark ; it has also been altered.
F. 85. 1l. 12-17 are in Wadeson's hand. The signatures of Bradshawe, Alleyn and Downton in ll. 7, 8 and 18 are autograph. ll. 1-6 and 9-11 are crossed off.
F. 85v. Rowley's signature in 1. 27 is autograph. The page is crossed off.
12. with thom \([m] e\) strowde. C. printed with the end of Strowde, and appended the note, "Malone miscalls this piece 'the second part of Thomas Strowde,' adding the conjecture in a note, that it was the same play as the Blind Beggar of Bethnall Green. (Shaksp. by Bosw., iii. 324.) There can be no doubt from this entry, which Malone overlooked, that it was a sequel to that drama." He does not say that the addition is interlined nor that it has been altered. There can be no doubt as to the genuineness of the interlineation, and after careful examination I have satisfied myself that the alteration is also in old ink. C.'s reading is quite impossible. H. first wrote thomm or thomme, but at the end of the word his pen had ceased to mark. He then touched up the \(o\), crossed out the second \(m\), and went over or added the final \(e\), thus reducing the name to the habitual form thome.
30. haies. This ought to have been printed hares, i.e. Harris (cf. 191v). It might be either, so far as this passage is concerned.
32. 23. (C. 3.)
F. 86. The page is crossed off.
F. 86 \({ }^{\mathrm{v}}\) The page is crossed off.
3. conquest. The \(t\) is barely visible.
14. \&o. (C. of.) There is a mark under the \(\mathcal{E}\), possibly the first stroke of an \(f\) (for).
29. Radfford. The duplication of the \(f\) is probably due to the pen not marking at first.
F. 87. The page is crossed off.
F. \(87^{\mathrm{v}}\). The page is crossed off.

Ir. furtenppozond \(\rho\). The apparent duplication of the \(p\) may be due to the pen not marking at first.
19. ther. The \(r\) is doubtful ; there appears to have been some alteration made.
F. 88. 11. \(2-15\) (including quittance) are in Langworth's hand. They are crossed off. 1. This line is at the very top of the page, and is completely smudged except for the initial \(B\). Probably \(H\). has been trying to imitate the writing below.
F. 88v. 1l. 8-18 are crossed off.
4. beaste. The name has been inserted in a space left for the purpose.
\(4 \& 5\). wittines. In both cases there are only two minims between the \(t\) and the \(e\), of which the first is dotted (cf. 3922 ).
F. 89 \(\quad 11.3^{-29}\) are in a hand which appears nowhere else in the volume, unless, as appears just possible, it can be identified with Dekker's (cf. 114). The signatures of Birde, Henslow and Harris in 11. 19, 30 and \(31 \mathbf{1 - 2}\) are autograph. 11. 1-4 are crossed off.
32. puker. This appears most plausible reading for the very illegible original. W. Harris, however, was a scrivener.
F. 90. \(11.1-7\) are in Chapman's hand, and the sig. in 1.8, which is in an Italian hand, very different from the entry, is presumably autograph, though unlike his signature found elsewhere (e.g. B. M. Addit. MS. 30262, f. 66), which is in the same hand as the entry. I1. 9-16 are in Paschall's hand, and Alleyn's signature, II. 17-18, is autograph. II. 9-16 are crossed off.
F. 90. 11. \(1-5\) are in Paschall's hand.
4. 1600 . The 6 has apparently been altered from a 9 .
F. 91. The page is crossed off.
11. of the 2 of. (C. of the [companye], the 2 of.)
20. [die]. The minim between the \(d\) and \(e\) is not dotted. I do not know what it can stand for.
F. 91. The page is crossed off.
3. In the sum H. apparently wrote \(x 7 j^{s}\), then added \(j j^{s}\) over the former ', and finding the result indistinct, drew his pen through it and repeated the sum above.
11. The original sum has been elaborately scored through, and can only be read conjecturally. H. evidently altered it several times, and having finally produced a perfectly illegible blot, crossed it out and entered the new sum above.
F. 92. The page is crossed off.
10. The space left for insertion of the title proving insufficient the last word had to be interlined.
16. head. There is a superfluous minim between the \(e\) and \(a\).
F. \(\mathbf{9 2}^{\mathrm{v}}\). The page is crossed off.
2. tanye, i. e. tawney. (C. lange.)
F. 93. The page is crossed off.
F. 93 \({ }^{v}\). The page is crossed off.
21. of the 19. (C. of the [companye], the 19.)
F. 94. In 1. 32, the interlineation Webster, together with a line below it, which may be intended for a caret-mark, is a modern forgery.
35. The original figures of the shillings are doubtful.
F. \(9^{2} .14\). prowed. The word is not quite clear.
F. 95. In 1.6 the interlineation together with the caret-mark must be pronounced a forgery.
9. There is, I think, little doubt that H. first entered the title as mortimer. The first \(m\) is unquestionable, the second more or less conjectural.
F. 95v. 1 I. Lentte. The duplication of the \(t\) is probably due to the pen failing at first to mark.
12. to taffly. (C. to [bye] taffty.)
F. 96. 11. \(1-6\) are in Williams' hand.
2. 2 the, for \(2^{t /}\), i. e. second.

3-4. It will be noticed that the two sums do not correspond. Whether the \(j\) in the margin is intentional or merely ornamental is not easy to say.
6. willās. The last letter, both here and on \(\mathbf{9 6}^{\vee}\), ends in an elaborate ornamenta. scrawl, and has itself rather the form of a \(z\). In view, however, of the form adopted in the entry, it would seem more probable that what the writer intended was merely an ornamented \(s\), or possibly \(\rho\).
F. 96". 1l. \(1-30\) are in Williams' hand.
3. \(p\), i.e. part, and so in \(11.12,14,18,19,23\) and 26.
12. September. The down-stroke of the \(t\) is barely visible.
34. J, for \(J\) say.
F.97. 8. clape. The \(p\) is badly formed and might possibly be an \(x\).
20. There is an indecipherable mark after the sum.
26. at \([d]\). It is probable that in place of \([d]\) we should read \(C\), i.e. \(100(\mathrm{cf} 411\).\() .\)
35. for, for fró.
F. 97v. 19. The mark looks at first sight like a badly-formed \(s\). The name was probably Oldfield.
F. 98 Alleyn's signature in 1. 10 is probably autograph.
io. The interpretation of Joan Alleyn's mark is purely conjectural.
F. 98\% \(\quad 11.1\) 1-9 are in Lyngare's hand, 11. 10-II in Griggs'.
15. donge, i. e. dung. The first minim of the \(n\) is dotted in error.
F.99. 9. diner. There is a word under this, but all that can now be made out is that the second letter (under the first minim of the \(n\) ) was an \(a\). The word the appears to have been crossed out, but it is possible that a rough attempt was made to alter it to for.
F. 100. 11. 9-1 3 are in Hathway's hand, Il. \(15-18\) in Hassard's. Clifton's signature in 1.8 is autograph, and probably Smith's in 1.14 also.
11. \(1-3\) are crossed off.
13. Hathouay. This should have a final \(e\) as in the other cases, though here it is not clearly formed.
F. 100 \(\quad\) The entry is in Chettle's hand.
F. 101. 11. \(1-7\) are in Dekker's hand, 11. 10-14 in Playstowe's. The signatures of Alleyn and Rowley in 11. 8 and 9 are autograph.
12. psent. The \(p\) is badly formed, and may have been altered from something else.
F. 102. The whole entry is in Paschall's hand, except Alleyn's signature, which is autograph.
F. 103. 11. 5-14 and 15-26 are crossed off.
8. \(x y j^{3}\). There is something under the \(\eta\).
F. 102 \({ }^{\text {v }}\). 11. 2-3 are crossed off.
6. In this line something has been carefully inked over.
7. Below this line to the right something has been clumsily but effectively erased. Possibly it was an unsuccessful attempt at a forged signature.
9. Several marks resembling 'ticks' have been smudged over immediately before the sum.
F. 103v. \(\quad\) 11. \(9^{-15}\) are crossed off.
F. 104. The signatures in 11. 17-26 are in Shaa's hand. 11. 1-14 are crossed off.
18. The pounds sum is too much blotted to be made out with certainty. The 3 is quite clear, the \(I\) may be written over or may have been altered to \(O\), while a third figure may have been altered to 8 .
F. 105. 7. deew. This is written over something which apparently began with \(v\).
F. 105\%. 3. Both the \(J\) (for \(/ n\) ) of this line and the a below it have been written over something else not now decipherable.
Jeffice. The title has been inserted in a space left. The last two letters are not clear.
20. Whether anything is deleted by the blot I cannot tell.
F. 106. 12. 27. (C. 29.) H. may have intended 29 , but in spite of a slight blot the reading 27 is quite clear.
13. Rebatous. (cf. \(\mathbf{1 0 6}^{v}\) 5.) The word intended is evidently rabatos, and the form here printed would be no unlikely one. I am not sure, however, that H. has not written Rebatons; he has Rebala for the singular at \(22^{\vee} 22\).
18. The title is filled in in a space left. Malone called the play "The "Two Harpies ' C. , who has too harpes, adds in a note that the word might be hapes, hopes, or harpes. There can be no question as to the letters hapes, but there is something before them. This looks at first sight like a \(c\), but I am convinced on examination that it is really an \(s\), of which the tail is all but invisible. The title is not in H.'s hand ; possibly Iownton's.
3x. There is a burn at the bottom edge which has destroyed part of the sum. The 7 is concealed by the mending paper. According to the addition the shillings should be \(r\), not 2 .
F. 106". 2. maye. An error for June.
9. 22. (C. 24.)
F. 107. 11. \(9-12,13-16\), and \(22-26\) are cancelled in the margin. They, however, have been restored by the insertion of the word steate or slete (stet).
In the top corner on the right is something which looks like 419 , but the 4 may be a crossed 'tick.'
31. Charme. The \(C\) is written over something, now indecipherable.
33. The addition shows that the alteration has been from 3 to 7 , and not vice versa. The \(o\) of the shillings has an accidental dot above it which makes it look as though it had been altered to \(I\).
F. 108. The alteration of the title in 1.9 , and the filling in of it in 1.20 , appear to be in Shaa's hand.
18. The date is blotted, but is almost certainly 9 . C. has 8 , which I do not think is possible.
F. 109. The space left for the title in 11. 16-17 has been filled in with a modern forgery. 11. 15-18 are crossed off.
9. \(\langle n\rangle\). Possibly the beginning of \(m^{*}\).
F. 111v. The entry which is in Paschall's hand has been made with the volume reversed. The page is not in C.
14. her ins. Probably herins, or perhaps hernis, the name of the farm.
\(\left[\begin{array}{ll}\text { in } & s\end{array}\right]\). This is smudged and presumably meant to be cancelled.
north eletch, for northe letch. Hampnet is a village near Northleach.
F. 112. 11. \(\mathbf{1}^{-25}\) are in Shaa's hand.
18. The alteration is badly blotted. The tails of a \(p\) and \(y\) show what the original reading was. In the correction the letters leav are legible.
24. Some apparently meaningless scrawls appear at the end of the line.
F. 113 \({ }^{v}\). If, as I imagine, the entry written up the page is in H.'s hand, he was taking unusual pains to write neatly.
F. 114. 11. \(\mathrm{r}-14\) are in Dekker's hand, though curiously different to the entry on 101. 11. \(15-17\) are crossed off.
F. 115. 29. saye. (C. layce.) The reading is in any case rather doubtful, owing to the word being blotted. It certainly, however, ends with \(e\) and not \(c e\), and we may, I think, read saye with some confidence. I am not sure, however, that an attempt has not been made to alter this into layce.
F. 115v. 2. \(x p o f e r\), i. e. Christopher. \(x p\) is, of course, a corruption of XP for xptatós.
13. There has been some alteration, and I am not sure whether the of is intended to be crossed out or not.
28. The title has been filled in. H. seems to have written albete and then to have made an \(r\) over the \(t\).
F. 116. In 1.6 H . left a space for the title. The forger has filled this in, and has struck out the word tragedie. In 11. 11-12 the forger has again filled in the title, and has also substituted playe for tragedie. In 1. 6 C. has a boocke of Robin hoodfellowe.
F. 116\% 11. in-14 are crossed off.
F. 117. 22. C. has the note, "This entry, having been previously inserted (p. 227 \([=\mathbf{F} .108])\), is erased with the pen." It is the previous entry, not this one, which is crossed off.
F. 117\%. 21. apoynttment. The duplication of the \(t\) is probably due to the pen not making it first.
F. 118. 14. The space left for the title proving insufficient, the word comodye was interlined below. This was then crossed out and the correct title inserted (cf. 1. 25).
F. 118v. 30. infortunat Jenerall. The title was filled in, and the \(v n\) which stands to the left of the alignment was apparently added later. Malone quotes it as 'the Fortunate General,' but his transcript has the correct reading.
F. 119 v. 6. cattanes. (C. Cattarnes.) The letter after the \(t\), either an \(a\) or an \(e\), is blotted and may have been altered. I do not think C.'s reading possible, but have no suggestion to offer.
F. 120 \({ }^{\mathrm{r}}\). Blackwood's signature in 1. 21 is autograph.
16. Henslow. This should have been printed Henslow̄, probably for Henslowe (cf. 100 ig).
Ff. \(122^{v}\) and 123 are not in C.
F. 123. 1. arynge. (? carying.)
F. \(123^{v}\). The page is not in C.
8. In the sum, ' \(8[3] 4\) ' should have been printed ' \(8[3] 4\).' The 83 has been altered to 84 , a larger 8 being formed over the original one, and a 4 over the 3 . In the shillings the \(I\) appears double, owing to the pen not having marked at first.
12. berynge. (beryinge.)
27. pd §o John. (pd to John.) kacke. (tacke.)
32. The boote was no doubt a boat.
F. 124. 11. 6-35 are not in C.
ro. The sum is filled in.
15. be. The word was omitted, and has been crowded in later.
28. The botte was again a boat, as appears from the next entry.
F. 124. The page is not in C.
5. Somme. I suppose this should have been printed Sonne. There are five minims between the \(o\) and the \(e\).
F. 125 \({ }^{\circ}\). The page is not in C.
8. Caralle. There is something under the al, now indecipherable.
N.B. - We now turn to the other end of the volume, where the entries are of course made the reverse way of the page. Here Henslowe's entries are mixed up with the forestry accounts of the Ashdown woods, 1576-1578. (See Introduction.) I no longer print the MS. consecutively, but extract those accounts only which are in Philip Henslowe's hand or relate to his affairs.
F. 238. For the scribble on this page see Preliminary Note at the beginning.
F. 238. Of the entries on this page a selection only appears in C.
F. 237\%. There is an addition amounting to £13 4s. 2d. in H.'s hand.
F. 237. 11. 23-27 are crossed off, having been accidentally duplicated from 238. Of the entries on this page a selection only appears in C.
21. \(\left.p_{1}^{r} a\right] c k e\). The \(a\) is blotted and may possibly be an e.
32. 1592. The last figure is uncertain. A 2 must be meant, but it looks more like a 3 , though not like a 3 of H.'s.
F. 236. The page is not in C.
9. The lower portion of the sum, which is written diagonally up the page, has been cut away. The " -2 is hidden by the mending paper.
F. 235v. There are various additions in H.'s hand on this page, also a little indecipherable scribble near the foot.
F. 234v. The upper portion of the page is occupied with earlier accounts. Immediately above the entries here reprinted are some figures in H.'s hand summed as 'Reste 458 dewe,' evidently referring to the first entry. Also a line of scribble, apparently 'Sonn is my most humble.'
F. 235. Of the entries on this page only a selection appears in C.
1. This heading appears to have been added later.
4. chen. Possibly we should read chem. There is a curl at the end which may be intended for a contraction mark. Perhaps the wood was for chimney-pieces.
19. dornexe. Probably the name of an upholsterer. We find 'hangenes for a howsse of dornackes' in the pawn accounts, 25 Sept. 1593 (59).
F. 234. 1l. 5-12, 13-16 and 22-24 are crossed off. 11. 1-12 are not in C.
9. some. Possibly sonne. There are four minims.
F. 233. The upper portion of the page is occupied with earlier accounts, except for an addition in H.'s hand at the top. 1. I is crossed off.
3. \(J\). (in.)
F. 233. 1l. \(16-24\) and \(25-32\) are crossed off. The sum to \(11.25^{-26}\) is also crossed off separately.
14. This item has been inserted subsequent to 1 . 15 .
F. 232v. The upper portion of the page is occupied with earlier accounts.
F. 232. 3. back. (bank.)
F. 230 \({ }^{\mathrm{v}}\). The entry occurs in the middle of some earlier accounts, a line of which intervenes between ll. 9 and ro.
1. 16. I suppose this is so, but the 6 is badly formed, so that it looks suspiciously like \(I\) (first).
1598. (C. 1599.)
6. thime. (time.)
F. 230. 11. 16-18 are crossed off (except margin). 11. \(1-8\) are not in C.
F. 229. The upper portion of the page is occupied with earlier accounts. The right bottom corner is torn close up to ll. io and 13. This was probably so when the entry was made.
r. Phillip. There is a curl at the end rather resembling a final \(s\).
F. 229. On this page is some scribble probably in H.'s hand made with the volume the other way up. It is much smudged, but some of it, including several names, can still be more or less deciphered: 'By me williamsone By me willsons Thomas hannde (?) Fahne Fines haslette pdonomey' and lower down 'Amen Aamen Amen \(w^{\text {th }}\) ovt \(\cdot\) (?)' The page is otherwise blank.
F. 221. These few lines of scribble (reversed) occupy the top of a page otherwise blank. They are not in C.
4. oblegaticion. At the end is a curl, perhaps for a final \(e\) (cf. 100 19).
F. 215 \({ }^{\mathrm{v}}\). This still more carelessly-scribbled repetition of the above occurs at the foot of a page of earlier accounts. It is not in C.
4. me. There seems to be a superfluous stroke after the \(e\).
F. 204. This entry is again made with the volume the other way up.
F. 201v. A few words have been scribbled at the foot of the earlier accounts with the volume the other way up. Apparently: 'you \({ }^{r}\) Righte Dowing Some is \(x^{11}\) Lamentable \(\mathrm{S}^{\text {neth }}\) Somplay'.
F. 191". Above this entry are some earlier accounts, in which Langworth's name appears.
F. 179. 1l. 8-13 are crossed off. The page is not in C.
22. at. There appears to be a superfluous minim between the letters.
F. 178 \({ }^{\mathrm{v}}\). An entry of the earlier accounts stands at the top of the page.
11. 12-16 are crossed off. The page is not in C.
7. The cancelled sum is rather doubtful, an attempt having been made to alter it before it was struck out.
18. nynand. (nine and.) The \(a\) has been written over something else and is blotted.
F. 178. The first eight or ten entries are verry confused, several having been altered and others interlined. It is not now possible to be quite sure which items belong to which name.
14. In the sum the \(x\) has been inserted later.
34. In the interlining qtrs should be qtrs.
F. 177v. 17. \(x v j^{i n}\). (C. \(x v j^{\circ}\).) It may be a slip of H.'s.
F. 168. The entry, which is written below some earlier accounts, is apparently in Wallis' hand. It is not in C.
F. 168. On this page occur some figures and scribble by H., partly entered with the volume the other way up. Of the scribble can be made out: 'Sallemenester Thomas Hamane mony John willsones Lamentable Somendations'. There is also a fragmentary entry in a hand resembling some of H.'s calligraphic scribble which runs as follows:
' Be it knowne vnto all men by this presentes that J williamsones carpenter of london dothe aknowlege my sealfe to owe \& stand fermely in deated vnto williamson'
F. 167. At the foot of this page is some scribble by H., made with the volume the other way up. The word 'Amen' is five times repeated, also 'god sau / ue or que' ' \(\mathrm{m}^{r}\) willsones Gorge chapman'. This leaf does not belong to the volume (see Introduction).
F. 162. This entry, made with the volume the other way up, stands at the head of an otherwise blank page. It is in a hand which does not occur elsewhere in the volume and which I cannot identify. It is not in C.
F. 159 \({ }^{v}\). Below some earlier accounts is a large \(M\) in H.'s hand, evidently the beginning of a memorandum.
F. 159. Lawrence's signature in 1.9 is autograph. The entry is not in C. At the foot of the page (reversed) are some additions by H.'s hand.
6. \(y^{\prime t}\) (yet).
F. 158v. Among some earlier accounts is a smudged scrawl of H.'s: 'Righte welle loved \& my very good friend '.
F. 151. The whole entry is in Dorington's hand.
F. 136 \({ }^{\text {v }}\). These entries are not in C.

Ff. 136-133 contain pawn accounts headed ' \(\mathrm{m}^{\text {rs }}\) grantes Recknynge 1593'. The dates run from 26 March 1593 to 12 Apr. 1596.
F. 132 \({ }^{\mathrm{V}}\). At the head of the page, otherwise blank, is a smudged scrawl in H.'s hand: 'The xvijth day of Nov. . . . 1597 '.
F. 131. The entry is in Shaa's hand, and both his and Ross' signatures are autograph.
F. 129. II. 1-14 are in Woodward's hand, except the bracket and sum, which were added by H. Alleyn's signature in 1.22 is probably autograph. 11. 23-27 are crossed off.
F. 128. This entry is not in C.
F. 127. The entry is very badly written in a hand which does not seem to occur elsewhere in the volume and which I cannot identify. It has some resemblance to Shaa's, but the entry is much earlier than any other by him. Welles' signature is autograph.

\section*{GLOSSARY}
[Only such unusual or erroneous forms are included as appear likely to obscure the sense. Names of persons and litles of plays are not given.]
\(a\), at, on.
ackes, acts.
\(\left.\begin{array}{l}\text { adm } \\ \text { adminy }\end{array}\right\}\) administrators.
adowe, ?, \(19^{\text {² }} 2\).

UNIVERSITY OF TORONTO LIBRARY
\(\begin{array}{lc}\text { PN } & \text { Henslowe, Philip } \\ 2589 & \text { Diary } \\ \text { H4 } & \\ \text { pt.1 } & \end{array}\)```

[^0]:    ${ }^{1}$ MSS., Second Series, No. 60. See Bickley, p. 99. The transcript contains the following portions of the original MS. : 7-11v (except 1. 46, a forgery), $\mathbf{1 2}^{v}, \mathbf{1 3}, \mathbf{1 4}, \mathbf{1 4}^{v}, \mathbf{1 5}^{v}, \mathbf{2 1} \mathbf{1}^{v}, \mathbf{2 5}$ (from
     broken off abruptly when he discovered the entries to be unimportant), $\mathbf{4 3 ^ { v } - 5 4}{ }^{v}, \mathbf{6 2} \mathbf{2}^{\mathrm{v}} \mathbf{- 7 1}$ (for the forgery on $64^{v}$, see below, p. xlii), $85^{v}-\mathbf{8 7}^{\mathrm{v}}, 91-95^{v}$ (except forgeries on 94 and 95 ), 96 (from 1 . 7), 104 (11. 1-14), 105-109" (except forgery on 109), 110 (11. 1-5), 115-120 (except forgeries on 116), 120 (except 11. 15-2 I), 121.
    ${ }^{2}$ See Warner, p. x. Unfortunately the Private-Sittings Books of the Governors apparently do not record the loan of the MS. either to Malone about 1790 or to Collier about 1830 . This is curious since we find mention of a loan to the Archbishop of Canterbury on June 9, 1819. The next is to Collier, the entry running thus (Bickley, p. 95) :
    " 12 Oct. 1840 . 'J. P. Collier, Esq., 24 Brompton Square having requested permission to transcribe Henslow's diary preparatory to its being reprinted by the Shakespear Society, ordered that the MS. be entrusted to Collier upon his engaging not to let it go out of his own hands and to return it within two months.
    'The MS. is in an old parchment binding and consists of 239 folios of which 22 are mutilated.'
    Collier signs the receipt of the Diary on the 13th of October, 1840."
    How the number of folios was reached I do not know ; the numbering now runs to 238 , but omits four blanks in the middle of the volume (see below, p. xv). Concerning the number of mutilated leaves which now appear, see below, p. xviii.

[^1]:    1 The leaves measure $13 \frac{3}{4} \times 8$ inches.
    ${ }^{2}$ This is inconsistent with his statement that it was only returned by Boswell after Malone's death ; see Alleyn Memoirs, p. 2.

[^2]:    ${ }^{1}$ These are consequently not reprinted in the present edition.
    ${ }^{2}$ For Collier's explanation of how he became possessed of this fragment, see below, p. xlix. Concerning other possible excisions by him, see pp. xxxv-xxxvi. Warner, p. xliv, should also be consulted for a Dulwich document quoted by Collier, which has disappeared from the collection, if indeed it ever existed. See also p. xxiii of the same.

[^3]:    ${ }^{1}$ Supposing, that is, that no leaves were missing when the numbering was inserted.
    ${ }^{2}$ I append a table of correspondencies between the new and the old foliation: 10=297, 20= $284,30=272,40=261,50=249,60=233,70=223,80=210,90=199,100=184,110=169$, $120=157,130=127,140=115,150=104,160=92,170=82,180=69,190=58,200=48,210=$ $34, \mathbf{2 2 0}=23,230=13$. Collier notes the absence of leaves between 48 and 49,54 and 55 , and 120 and 121, i.e. 251, 242-4 and 154-6 (see pp. 131, 148, and 250 of his edition).

[^4]:    ${ }^{1}$ The Henslowe or Hensley family had been connected with this district for some time. One Edmund Henslowe, who is said to have been the father of Philip, held the post of master of the game in Ashdown Forest and Broil Park as early as 1539 and again in 1556-7. See Warner, p. 157.
    ${ }_{2}$ They bear the dates November, and December 28, but without indication of the year.

[^5]:    ${ }^{1}$ Collier (p. 252) states, with regard to the private accounts which he omitted after 124, that 'Some of the items shew that the Henslowes had property at East Grinstead.' All we learn, however, is that William Henslowe 'feched owt his write for his witneses at grensteade' and borrow 5s. of Philip for the purpose. But see 159 for an account which may conceivably be connected with Ashdown Forest.

[^6]:    ${ }^{1}$ A rent-book of Henslowe's is preserved at Dulwich, MS. xvini, 6. It is a few years later than the entries in the Diary, namely, $1604-\mathbf{I I}$, but the form of entry is identical. See Warner, p. 339.
    ${ }^{2}$ Similar entries are found in Dulwich MS. viri, end. They are in Alleyn's hand, See Warner, p. 164.

[^7]:    ${ }^{1}$ Mathematically of course the problem would be insoluble, or at least indeterminate, and though it can usually be solved with some approach to certainty under the less stringent conditions of concrete reality, the analogy is a useful reminder of the possibility of error.

[^8]:    ${ }^{1}$ In the forestry accounts by John Henslowe, it looks as though $l \mathrm{~s}$ were sometimes employed in place of $l l$ or $l i$.

[^9]:    ${ }^{1}$ Since writing the above I have had an opportunity of examining some of the other MSS. preserved at Dulwich. It is, I think, highly probable that 22 5-19 is in Alleyn's hand, and just possible that $127^{\mathrm{v}}$ I-14 may be too. I cannot, however, speak with any certainty. Alleyn's hand certainly presents very great variations.
    ${ }^{2}$ Collier (p. 191) notes: "This memorandum was drawn up by Harris, the scrivener, and signed by Henslowe." It is of course possible that the entry may be in Harris' hand, though it bears no likeness to his signature. Collier takes no account of the mysterious subscription which I have rendered by 'puker.'
    ${ }^{3}$ Collier (p. 269) notes: "This undertaking appears to have been written by some third person and only signed by Wells." He is probably right.

[^10]:    ${ }^{1}$ In spite of the statement in the edition of the Diary, the original remark was allowed to stand when the History was reprinted in 1879 . This need not surprise us, for the impudence with which all sorts of documents, shown in the interval to be spurious, were republished in those volumes, is one of the most objectionable features of the whole business. Collier's best excuse is that he was then in his ninetieth year. He died in 1883.
    ${ }^{2}$ On a number of points in his strictures on Malone, Collier is grossly incorrect, but as they do not appear to throw any light upon the condition of the MS. when he first had it in his hands, they need not be discussed here.
    ${ }^{3}$ It is to Ingleby that belongs the credit of having first called attention to the fact that the Diary contained spurious entries. In a letter to the Academy of April 1, 1876, he pointed out two specific forgeries ( B and N of the above list). Dr. Warner, when preparing his Catalogue, was unaware of this, and omitted to mention the second of the entries, which led Ingleby to repeat his remarks in Notes and Queries, Series 6, IV, IO3 (August 6, 1881).

[^11]:    ${ }^{1}$ I believe that some of the crosses appearing in the margin are modern, and may have been made by Malone, but of these I have not thought it necessary to take any notice. See note on 124 .
    ${ }^{2}$ I should say here that every entry stated to be spurious is condemned upon internal grounds, and any remarks as to the motive or circumstances of the forgery are merely added as corroborative evidence. I am particularly indebted to Dr. Warner for calling my attention to the entry marked $H$ in the above list, which somehow escaped me even after I had detected its twin-brother I. With regard to K, I am bound to admit that Dr. Warner, while considering the insertion highly suspicious, hesitates to pronounce unqualified sentence. With the intrepidity of youth I have ventured to include it in the black list. It would certainly not be right to treat it as supplying trustworthy evidence of the identity of 'maxton' and Marston.

[^12]:    ${ }^{1}$ Most of his comments on forgeries in the Diary will be found in his description of the MS., pp. 157-163 of his Catalogue.
